OIL FOR LOCOMOTIVE FUEL.

The cost of locomotive fuel is one of the largest items of expense in railroad operation and is usually the largest single item, excepting wages. It is also one of the most difficult to control. Efforts to secure lower fuel bills have been continuous from the first use of the locomotive engine. All that has been done, however, to economize the use of fuel has had only a relatively small effect on the total for that item of expenditure. When, therefore, an opportunity of decreasing the initial cost of fuel by approximately half presents itself, railroads are not slow to take advantage of it. It happens that within a year or two, in order to secure such an economy, the Atchison has changed all its engines in use in Southern California to substitute oil in place of coal as fuel, and that the Southern Pacific is also rapidly equipping all its engines in the same section, so as to dispense with coal for producing steam in favor of oil.

This result has followed the development of oil fields in Southern California, particularly in the Los Angeles district. The two railroads between them have nearly 200 engines equipped to burn oil, and, what is especially interesting, these engines have been arranged so that they cannot burn coal without more or less extensive remodeling of their fireboxes. Previously locomotive designers in providing for the use of liquid fuel in fireboxes have always so arranged the appliances that the engine could burn coal without special disadvantage if it should become advisable to give up oil. Most engines using any form of liquid fuel also burn coal at the same time, oil being used as a supplementary or auxiliary force. On the Great Eastern Railway of England, where experiments in burning oil on locomotives have extended over many years, most or all of the 58 engines using oil fuel are arranged to use oil and coal in the firebox at the same time. This is also the case on the roads on the Continent of Europe, in Austria, Russia and elsewhere.

All these countries together have not, however, as many engines using oil for fuel as in Southern California, where the development hardly goes back two years. Experimental use of petroleum from the local wells at Los Angeles has been in progress for some little time; hence when further discoveries of oil fields two years or so ago gave assurance of a practically permanent and ample supply at low cost, the railroads were prepared to adopt it, and did so promptly and widely, until now, as stated, oil is used as fuel in all engines which are regularly operated on the divisions within easy access of the oil wells.

The high cost of coal in Southern California, and the poor quality for steam-producing purposes of most of that available to the railroads, was a special feature of great importance in operating conditions, hastening the decision of the railroads to develop the use of oil. Such figures of the relative economy of oil for locomotive use as are available are interesting. Officers of the California railroads say that the cost of oil at $1 a barrel is about equivalent for locomotive burning purposes to coal at $4 per ton. As these railroads have been paying $7 and $8 per ton for coal, the saving to them is obviously considerable. Putting the matter in another way and more definitely, it may be stated that in the tests to determine the relative efficiency of coal and oil, the engines ran about 38½ miles to a ton of oil and 26¾ miles to a ton of coal. Six barrels of oil of 42 gallons are about equal to a ton in weight. It appears, therefore, from the above figures that a quantity of oil costing $6 gave a service, as measured by the locomotive mileage made equivalent to a quantity of coal costing $10 44 at $7 25 per ton. The Atchison alone for its one hundred engines consumes about 2,000 barrels of oil daily, and on this basis the saving shown by the above figures works out a very considerable one.

Extension of the use of oil in place of coal as a locomotive fuel is a mere matter of relative cost. Engines can be easily arranged to use a liquid fuel. The saving to railroads in California is probably greater than would be shown elsewhere, because they are so far removed from a coal supply. The many bituminous

coal fields in this country give the railroads cheap coal, so that in this country under present conditions coal is not likely to be supplanted on an extensive scale as an engine fuel.

An interesting point is that the fuel supply question is an important one in foreign countries and in the Pacific islands, and when fuel has to be carried long distances oil is more easily handled and usually should prove cheaper than coal. It may happen, therefore, that a great extension of the use of oil as a locomotive fuel will occur in foreign countries, and this week newspaper items have stated that the most important of the Mexican railroads has made a long-term contract with a company owning oil-bearing lands in Mexico for supplying oil fuel for its engines. It is said that under this contract fuel will be supplied at a cost of $1 20 per barrel. This cost is higher than that given above as the price of petroleum to the railroads in California, but even at the higher price an economy in fuel cost would be shown, taking the same price of coal as in California. A new supply of cheaper fuel to the Mexican roads is, however, probably relatively more important than even in Lower California. In the 1899 fiscal year of the Mexican Central, for instance, the company spent almost $2,500,000, of which $2,107,000 was the cost of coal for locomotive fuel. That amount is approximately a fifth of the company's total expenses for the year, and is two and one-half times as large as any other single item of expenditure shown in the summary of expenses published in the annual report for 1899.

LIGHT CARS IN HEAVY TRAINS.

The railroads are finding that a new and an urgent problem is being forced upon them in the use of the heavy type of locomotives and the larger-capacity cars which have come into such a widespread use of late. Few railroads are able to employ the new heavy equipment in full trains, and the running of trains composed of the old style light-weight cars, even those of 60,000 pounds capacity, in the same train with 80,000 lb. and 100,000 lb. cars, has resulted in enormous damage to the lighter cars. The time these light cars are in profitable service has become considerably diminished by the frequent necessity of sending them to the shops for heavy repairs required by the damage done to them through the unequal strains in mixed train service.

This loss of the service of cars, in the present period of enormous tonnage movement, when few railroads, even with the large additions to rolling stock which have been made in the last three or four years, have more than the equipment which can be used in profitable service, means a considerable loss. In addition, there is the direct cost, which frequently appeals to managers more forcibly than a loss in revenue, of the largely increased expenses for repairs to these freight cars.

This problem of the heavily increased cost of repairs has become so important that it promises to subordinate other topics of discussion in the mechanical development of the railroads. One eminent authority has stated that fully 70 per cent of the freight cars in the railroads in the United States now out of service and awaiting repairs consists of cars whose coupling and draft-rigging appliances have been insufficient to sustain the pulling, blows and other strains they have received by being operated in mixed trains. With over a million of these light wooden cars in service, the size of the problem is evident. These cars cannot be permanently retired from service for years to come without seriously embarrassing many railroads. Many of them are of comparatively recent construction, and in ordinary course under normal strains of service would have a profitable life of many years. Their retention in use, however, under present conditions, is only possible at a heavy cost of repairs, and this is so constant that some railroads have made an arbitrary rule to retire light-capacity cars when they come into the shops needing repairs costing $60 per car, or more than that. This rule applies to 15 and 20-ton cars.

There are many railroads, however, which can hardly afford to adopt that rule, and yet they find that under the severe treatment which cars now receive in through service a large proportion of their freight equipment is constantly awaiting repairs for broken end sills, body bolsters, draft timbers and centre sills. These damages are bound to increase when cars built to be run in trains of 625 tons are used in trains hauling 2,000 tons and drawn by locomotives of enormous pulling power.

The weakness of this light-capacity equipment has brought home to railroad officers the fact that there must be a radical strengthening of draft gear in order to avoid costly action and to insure a reasonable life to the great number of these cars. The statement has been made that a uniform and adequate type of coupler and draft gear, if generally used by the railroads of this country, would eliminate nine-tenths of losses and repairs now incurred. The trouble is that it is exceedingly difficult to get the railroads to generally adopt and to adhere to a single type of appliance, even though its adequacy to remedy existing faults may be unquestioned.

This has been shown in the experience with the introduction of the present standard vertical plane coupler. Though in adopting that type of coupler, railroads anticipated securing practical uniformity, perfect interchangeability and the reduction of the number of types to a very small number, there are now nearly one hundred different vertical plane couplers in more or less general use on the railroads of this country, more than in the old link and pin type days.

To overcome the present demoralizing condition in freight car equipment brought about by the heavy damages sustained by cars under the present operating conditions, railroads will have to agree to eliminate most of these types of couplers, and to accept a new form of draft gear which will be applicable for use in mixed trains of the light and heavy cars. It will be years before cars of twenty tons and less capacity are eliminated from service, even with this equipment going to pieces as rapidly as it is under present conditions. The effort to revise the draft gear must therefore be undertaken, and the reform, though it may require patience to secure its accomplishment, should be studied and applied as fast as practicable.

TELEPHONES IN TRAIN-DISPATCHING.

Every little while the daily newspapers announce that one or another prominent railroad has decided to use the telephone in place of telegraph wires in train-dispatching. These statements are to be accepted only with modifications. It is pretty certain

that no large railroad is ready to dispense with the use of telegraph wires in transmitting train orders. Larger companies, indeed, are less likely to make extended use of telephonic train orders than less important lines, because they are more likely to be extending their signal appliances and thus to be less dependent on the transmission of train orders by telephone or telegraph. Nevertheless, telephones are being increasingly used in communicating train orders, and the practice is commended with certain limitations by officers of a number of the best managed lines.

A little while ago the suggestion that the telephone could be so used, except under peculiar local conditions, was pronounced impracticable. It may be admitted that the use now made of telephones in train-dispatching would not be possible without improvements in construction and equipment which have been brought about recently. Prejudices, however, have had to be overcome and perhaps something still remains to be done in this direction. It may now be asserted that with proper precautions train-dispatching by telephone is as practicable and as safe as by telegraph, providing that the telephone line and instruments are modern and in good condition.

In part, the advantages received by the use of the telephone are that the lines will often work sufficiently to have orders understood when messages cannot be sent over telegraph wires; the system likewise can be used on new lines or branches of light traffic where the cost of having telegraph operators would be burdensome. So, also, on lines fully equipped with telegraph offices, where consequently the telephone for the chief movement of trains would be inadvisable, or not worth while, the telephone could be easily arranged for use at night where the roads cannot afford night telegraph offices.

An objection raised to the telephone in train-dispatching service is that while a telegraph order is immediately recorded and verified before passing to the hands of the train men, the spoken message over the telephone may be misunderstood. If this objection held, it would be so serious as to preclude the use of the telephone, and this distrust did exist generally for a long time, and does to this day to some extent. Nevertheless, the experience of the railroads using the telephone does not bear out this contention. No train order message is good until it has been repeated back to the sender and pronounced correct. The same practice is followed in telephone train orders as in the telegraph system. Instead, however, of receiving the order through an intermediary person, or perhaps several, like the telegraph operators, the trainmen receive the message directly from the dispatching office. Two methods have been developed in practice. The conductor receives the order and repeats it back for verification, or the repeating back is done by the engineer; on some roads two telephones are provided at each station where trains receive orders, and the engineer and conductor each receive the order, and each repeats it back before it is made correct, and the two orders are then compared.

With a good telephone equipment and with the verification by repetition of all train orders, conservative railroad officers state that the telephone can be relied on in this service as absolutely as the telegraph. The standard code of train rules was written of course with the idea of telegraphing only in mind, but the advocates of the telephone system say they can be easily amended so as to be equally applicable to one system as the other. Reports of trains passing given points, train registers and other matters can be provided with the telephone system as with the telegraph.

This last statement brings up a limitation in the telephone system. Reports of train movements can be made to the home office by telegraph without action by the conductor of the train, or without stopping the movement of the train. With the telegraph operator eliminated, however, there is no one to report the movement of trains, unless it be station men, and these are often too far apart. Trains must, therefore, be stopped to enable the trainmen to report. On a road with many fast trains this would not be practicable. It is only feasible where the train speeds are low or where trains make many regular stops, which really means the same thing. For these reasons it may be a question whether the telephone will be widely used on so-called standard lines.

Again is the fact that these larger lines are using the block system more and more, and the train-order system is thus eliminated. Some of these roads, however, are using telephones in preference to the telegraph as a quicker and more efficient means of communication between the block-signal stations, so that with any interruption to their automatic signals train movements could probably be directed by telephoned orders. If this system is not likely to be established regularly on important roads, it may be said to have plenty of opportunity for development on branches and on new roads of light traffic, where the employment of regular forces of night and day telegraph operators is not warranted and where the question of speed of trains is not an important one.

EXTENSION OF BLOCK-SIGNAL SYSTEM IN THE UNITED STATES.

Interesting statistics recently compiled of the mileage of railroads in this country protected by block signals, and the different systems in use on the various roads, form a most encouraging exhibit of the progress made by American roads in this method of train protection. In brief, they show that 13 per cent of the railroad mileage of the United States is operated under block-signal protection. Taken in connection with other figures showing the extension of the use of interlocking and other forms of signaling, published in the CHRONICLE some weeks ago, they show that even roads with comparatively light traffic have been ready to put in costly installations of signals to insure all possible means of avoiding accidents or delays to their train service. The rapid extension of block-signaled lines means more than this. It proves the readiness of American managers to surrender deep-settled convictions on an essential principle of management to adopt totally different views when even limited tests and experience had indicated the usefulness of a new system.

A dozen years ago most American managers depended upon the time interval spacing of trains, supplemented by the system of written orders from train dispatchers to conductors and engineers and of flagging by delayed trains. That system is still used with satisfaction on much the larger portion of the railroad mileage in this country. It is only within ten or

twelve years that any considerable number of managers have been ready to admit its weaknesses and to acknowledge the need of a more complete means of governing the running of trains. In adopting the block system they have abandoned the primary ideas of the train-order system, the preserving of a minimum interval of time between trains, and issuing orders to trainmen. For under the block system a minimum interval of space between trains is the fundamental idea; moreover, it relies on mechanical devices and the human agency is reduced to the setting of signals and the observance of their indications. In the more perfected automatic systems a preceding train sets the signals for the one following. This reduces the liability of error through failure of the human agency to the least possible point.

Obviously, the idea that greater safety could be assured through automatic working of signals than by placing entire dependence on engineers and conductors could not have won general acceptance unless years of experience had proved it. But there is now no doubt about it. Records available show that on roads with over three million train movements yearly, the false indications given by automatic signals figure out as one in one million movements. This is as near absolute accuracy as can be expected of any device, and is far better than the records made where reliance is on apparatus worked by men, or on men alone.

The figures above referred to were compiled by Mr. B. B. Adams and recently published in the "Railroad Gazette;" they show that there are over 26,609 miles of railroad in this country on which trains are protected by the space interval or block system. This represents main or branch road, and not trackage. As roads which are busy enough to operate second, third or fourth tracks will naturally be in special need of the protection which block signals or the best signal appliances afford, the proportion of double-track line in the above total is naturally large. While the trackage is not summarized in the statistics, the detailed figures indicate that the second and fourth track line included, aggregates about three-fourths of the total. That is to say, 16,100 miles out of 26,609 miles are double, third or fourth track. As indicating the comparative rapidity with which the railroads have installed the block systems, Mr. Adams points out that early in 1892 only about 3,000 miles of road were equipped with block signals.

Out of the total of 26,609 miles given above, the block system is in force for all trains on 18,186 miles of road. On 7,576 miles of the difference between these two figures the block system is used only for protecting passenger trains, and on 847 miles more only during fogs. Analyzing the figures further, it may be said that 2,289 miles of road are operated by automatic signals and 23,526 miles by the so-called manual systems, in which signal station operators control the movement of signals. In addition are the 8,423 miles reported above as worked only part of the time or for passenger trains only.

It is interesting to note the mileage reported as under the block system by individual roads. Eliminating companies not enforcing this system regularly, the Chicago Milwaukee & St. Paul stands first, having 2,043 miles on which block signals are installed. Other roads with a large mileage equipped with block signals are: the Lake Shore & Michigan Southern, with 1,488 miles; the Chicago & North Western, with 1,413 miles; the Erie, with 1,227 miles; the New York Central, with 1,171 miles; the Lehigh Valley, with 1,114 miles; the Atchison, with 1,031 miles, and the Chesapeake & Ohio, with 1,020 miles. Very little, however, of all this mileage has automatic signals—scarcely 500 miles out of the 10,500 miles comprised in the totals of these eight companies, and of this 500 miles the Lehigh Valley is to be credited with 312 miles.

Without extending the list too far, it may be said that among other companies with a large amount of line block signaled are the Norfolk & Western, with 877 miles; the New York New Haven & Hartford, with 689 miles; the Chicago & Eastern Illinois, with 725 miles, the Michigan Central, with 515 miles, the Pennsylvania, with 934 miles (exclusive of 384 miles on the Western lines), and the Philadelphia & Reading, with 376 miles. These last two roads are specifically mentioned because the length of their road protected indicates imperfectly (relatively to the figures given for other lines) the extent of their block signal equipment, which is of the costliest and most perfect character. Of the Pennsylvania's total, for instance, 121 miles is four-track line, with electro-pneumatic automatic signals, and only 43 miles of the 934 miles is single-track road. Reduced to a single track basis, Pennsylvania's signal equipment would be the equivalent of 2,310 miles of line. It has over 500 miles of track equipped with automatic signals, the largest installation in this country.

In discussing the state of a road's traffic when its trains should be protected by block signals, Mr. Adams says that as soon as a road has enough business to warrant the employment of regular station agents on duty all the time, it should have the block system. With a moderate number of trains the manual is the only block system that can be used, because the cost of the apparatus for the automatic system would be prohibitive; whereas, the attendance necessary with the manual system can be devolved upon station agents, whose other duties are light, and whose attendance at their offices will cost nearly or quite as much if they do not do signaling as if they do.

HISTORY.—Receivers were appointed in February, 1896, but on July 1, 1899, the road proper was returned to the company, the reorganization plan (in V. 66, p. 1235,) having been consummated without foreclosure and the road and equipment vastly improved in physical condition. All direct obligations, except those shown in the table, were either declared due and payable per order of Court and discharged, or exchanged for new securities (see V. 69, p. 25, 30, and V. 68, p. 1022. The reorganization of the B. & O. Southwest. was effected and new securities issued in Sept., 1899, per plan in V. 67, p. 688, the consol. mortgage of 1893 having been foreclosed, and the road is virtually merged.—V. 71, p. 1218. ORGANIZATION, CONTRACTS, ETC.—The Company was chartered in Canada February 28, 1868, and debt readjusted in 1878. In Nov., 1882, a close contract was made with the Michigan Central for 21 years from January 1, 1883, providing for the payment to Canada Southern of one-third the joint income over all fixed charges. The contract provided for a re-apportionment every five years, and in December, 1892, it was agreed to give the Canada Southern 40 per cent and the Mich. Cent. 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided on the basis of one-third and two-thirds, as before. But under the original contract each company is still accorded all benefit from the reduction in its fixed charges; consequently as the Michigan Central to Jan. 1, 1898, had reduced its charges about $327,000, that amount is credited to it before division is made V. 64, p. 5.

The old indebtedness, including the U. S. Government loan, excepting about $693,000 bonds, has been discharged. The new securities are:

(1) *Common stock*, $67,275,500, all held by So. Pac. Co.

(2) *Preferred stock*, 4 per cent cumulative, authorized issue $20,000,000, delivered to Southern Pacific Co. in consideration of issue of equal amount at par value of the Southern Pacific Company's 4 per cent gold bonds; of which delivered on completion of readjustment, $12,000,000; reserved to be delivered only to provide additional funds, if required, for the payment of 3 per cent notes to the United States, and thereafter only for betterments and additions, $3,000,000; reserved to be delivered for improvements and additions at not exceeding $200,000 yearly, $5,000,000.

(3) *First refunding M. gold 4s*, $100,000,000, and secured by all the railroads, terminals and equipment now owned, including about 1,349 miles of first track, etc., by deposit as collateral security of over 95 per cent of the old mortgage bonds. Of the authorized issue $44,109,537 is held by the United States as collateral for 3 per cent notes. See ABSTRACT, V. 69, p. 808, and V. 70, p. 739.

(4) *Thirty year gold* 3½s, $25,000,000, secured by a second lien upon all the properties covered by the 1st ref mortgage, and also by deposit with the Trustees as acquired of all securities and moneys held in any sinking fund of the Central Pacific RR., consisting Jan. 1, 1899, of $12,553,000 in securities and $86,459 cash, and by a trust deed upon all the lands covered by the mortgage dated Oct. 1, 1870. See Mortgage Abstract, V. 69, p. 858; also see p. 851. From the proceeds of these sinking funds and land sales cancellation of bonds will be made from time to time; in February, 1900, $2,505,000 3½s were canceled, and to Jan., 1901, $1,313,000 additional had been canceled, reducing the amount outstanding to $19,877,000.—V. 70, p. 739; V. 70, p. 1194.

(4) *Twenty three-per-cent notes*, aggregating $58,812,714, issued to the Government in settlement of subsidy debt; $14,703,179 paid, leaving $44,109,537 to mature, $2,940,635 half-yearly Feb., 1902, to Feb., 1909. First refunding 4s are deposited to retire them when due.

Status of New Company.—The fixed charges will aggregate $4,875,000; on the 4s held by the Government the saving of 1 per cent per annum until Feb. 1, 1901, or about $470,000, while the sinking funds will earn about $695,000, making net charges $3,710,000. V. 70, p. 739.

LAND GRANT.—Total land grant was about 12,000,000 acres, of which about 7,370,000 acres remained unsold on Feb. 1, 1899. Sales in 1898-9, 43,420 acres; cancellations, 8,340 acres. Land contracts on hand July 1, 1899—uncompleted payments, $131,508; principal of deferred payments, $630,692; and interest do., $583,914; average price per acre, $4 70.

GENERAL FINANCES.—Cancellation of the 3½s of 1899 are being effected from time to time from the proceeds of the sinking funds and also from land sales, $2,505,000 of the bonds being thus retired early in 1900. V. 70, p. 279, 739. Payment of one of the notes for $2,940,635 held by the Government was anticipated in Feb., 1900, releasing an equal amount of 4s deposited as collateral, which were sold.—V. 70, p. 429, 480.

The Southern Pacific Co. has acquired the stock of the Cent. Pacific RR., issuing its own stock for $67,275,500 as part consideration, and also $36,819,000 collateral 50-year gold 4s, secured by a collateral trust mortgage covering all the new Cent. ORGANIZATION—This *railway* company was organized in April, 1900, and purchased substantially all the stock of the Chicago & Alton *Railroad* Company, viz., $18,322,400 of the $18,751,100 common and $3,472,200 of the $3,479,500 preferred stock, all of which has been deposited as security under the first lien mortgage of 1900; also the line of the St. Louis Peoria & Northern between Springfield and Grove, 57 miles. The *railroad*, whose separate existence is maintained for legal reasons, has been leased for 99 years from April. 1900, the rental being the net earnings, after payment by the lessee of all interest on bonds, taxes and other charges, etc. (See V. 70, p. 686, 995.)

STOCK.—Authorized, $20,000,000 each of common and 4 per cent non-cum. preferred; issued in amounts as shown in table above, the unissued stock being reserved to exchange for the outstanding stock of the *railroad* company not now owned.

DIVIDENDS.—First semi-annual dividend on preferred, 2 p. c., paid Jan. 10, 1901.—V. 71, p. 1166.

BONDS.—The first lien 3½s of 1900 are secured by practically the entire capital stock of the C. & A. *Railroad*, as shown above, and by a direct first lien on the former St. Louis Peoria & Northern Ry., extending from Springfield to Grove, 57 miles.—V. 70, p. 894, 944. (See application to list in full in V. 71, p. 1021.)

The *railroad* mortgage securing the 3 per cents of 1899 will refund bonds marked "¶" in table maturing during next four years and also provide fund for improvements and extensions. Bonds in excess of $40,000,000 may be issued thereunder on vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1,000,000 per annum from Jan. 1, 1900. Stockholders in 1899-00 purchased $32,000,000 of the new 3 p. c. bonds at the rate of $650 cash for each $1,000 face value; V. 70, p. 739. See official circular in V. 69, p. 178; also p. 26, 129, 541; V. 70, p. 429, 995.

GENERAL FINANCES.—The charges of the Chicago & Alton RR for interest, rentals and 7 p. c. dividends have in the past aggregated about $2,600,000. The status of the property is now as follows:

Rentals payable by railroad co.; assumed by railway co....	233,030
Interest at 3½ p. c. on $22,000,000 bonds of railway co....	770,000

Total.....	$2,744,430

Net income for year ending June 30, 1900, $2,964,628. The new management has made large expenditures for the development of the property, having purchased 4,000 new freight cars and 77 heavy locomotives, and undertaken important work in the reconstruction of bridges, etc.—V. 70, p. 686, 894, 944, 995.

The money to pay all the existing 6 and 7 per cent bonds having been deposited with the United States Trust Co., together with the interest thereon to the maturity of the several loans, the annual interest charge of the C & A. RR. Co. is virtually 3 per cent on the $31,988,000 new bonds, viz., $959,640.—V. 71, p. 1012.

ORGANIZATION, &C. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. In 1880 the Burlington & Missouri in Nebraska was absorbed. The Chicago Burlington & Northern and other subsidiary lines in Illinois were absorbed in May, 1899. V. 68, p. 975. In Dec., 1889, acquired Chicago Ft. Madison & Des M RR. V. 70, p. 75. In June, 1900, the Kansas City & Omaha was acquired. V. 71, p. 134. The stockholders voted on Nov. 7, 1900, to purchase in fee the remaining leased lines in Iowa and Missouri held under lease, viz.: Kans. C. St Jos. & Co. Bluffs, St. L. K. & N. W., Chic. Burl. & K. C., Han. &. St. Jos., Keokuk & West. and Chic. Ft. Mad. & Des Moines, Burlington & Missouri River, etc.—V. 71, p. 697, 863, 963.

A branch from Alliance, Neb., to Guernsey, Wyoming, and from Brush, Col., north to a junction therewith at Northport, Neb., about 150 miles, was opened Sept., 1900, of which 23 miles is Union Pacific trackage. V. 71, p. 437. In Oct., 1900, extension from Toluca, Mont., to Cody City, Wyoming, 120 miles, was under construction, of which about 50 miles had been graded.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, and in 1880 a distribution of 20 per cent was made. From Sept. 1, 1890, to January, 1901, $12,741,900 stock was issued to retire an equal amount of convertible debentures, leaving still outstanding $2,522,000 convertible bonds. In April, 1899, $4,041,500 additional stock was subscribed at par, and stockholders of record on Feb. 7, 1901, are offered the right to March 1 to subscribe at par to new stock to the extent of 10 per cent of their holdings. V. 72, p. 136. See "General Finances" below.

SINKING FUNDS.—Included in the bonds outstanding in the table above are sundry bonds of the company which are held alive and drawing interest for account of the various sinking funds.

BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.

The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest and those bearing interest at less than 3 p. c. at par and interest on any coupon day after thirty years. The issue is limited to $85,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River (including the Chicago Burlington & Northern and other lines to be merged), upon the payment of $28,924,000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and $23,238,000 were issued in 1899-1900, as below stated. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771; *abstract*, V. 69, p. 283; V. 69, p. 795.

The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track (of which Jan. 1, 1897, there were 88 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.)

Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m.

The collateral trust *Nebraska extension* bonds of 1887 (New England Trust Co., of Mass., trustee) are issued at $20,000 per mile for single and $10,000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $278,600 having been retired in 1900. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ into stock any time prior to Dec. 1, 1902, except when books are closed. $12,741,900 had been thus converted up to January, 1901. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

Many of the bonds are redeemable (may be drawn) before maturity at various prices, plus accrued interest, as stated in the table above.

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1900, of the bonds given above as outstanding: Of **g**, $5,148,000 July 1, 1900; **h**, June 30, 1900, $1,931,000; **k**, $364,600. Also canceled bonds not included above, **f**, $3,364,000, July, 1900.

GENERAL FINANCES.—The Chicago Burlington & Quincy Railroad has been one of the most profitable in the country, as its numerous branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In April, 1899, stockholders subscribed for $16,166,000 new 3½ per cent bonds at 75 and $4,041,500 stock at par. In Jan., 1901, stockholders were offered the right to subscribe to 10 per cent (about $10,000,000) new stock, the proceeds to be applied about as follows: To redeem sinking fund 5s, due Oct 5, 1901, $2,315,000; to reduce grades, etc., $2,000,000; to build road, Toluca, Mont., to Cody, Wyo., 120 miles, $2,000,000, and balance for equipment, real estate, etc.—V. 72, p. 136. The first issue took up the bonds of Chicago Burlington & Northern RR. and $1,076,000 Ottawa Oswego & Fox River Valley bonds, amounting in all to $13,787,500, at a cost of $14,235,575. The balance is to be used for improvements. Interest on the new bonds began July 1, 1899. See circular V. 68, p. 771; V. 69, p. 751. The C. B. & N. was merged in May, 1899. In 1899-00 an additional $5,076,000 Illinois Div. bonds were sold for construction purposes, etc., and $4,972,000 were exchanged for underlying bonds.—V. 70, p. 739, 1248; V. 71, p. 751, 808.

The company's sinking funds have received to June 30, 1900 over $20,350,000. With this money about $8,000,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1899-0 the aggregate sinking fund income was $1,098,072, of which $487,400 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

As unencumbered assets, on the other hand, the company owns besides the $14,244,900 Hannibal & St. Joseph stock above mentioned, a large amount of stocks and bonds, a list of the same being in V. 63, on pages 778 and 877. The road unbonded and the roads whose bonds are all owned were on June 30, 1900 (V. 63, p. 775), as follows:

	Miles.
Northerly Extension, Alliance, Neb., to Billings, Mont., and branches	621

An extension from Marion, Ill., to Thebes, 63 miles, connecting with the St. Louis Southwestern, was completed in Jan., 1900. V. 68, p 231; V. 68, p. 771 Extension to Joppa, Ill., 15 miles, completed Jan., 1901.

In Dec., 1900, the Southern Ill. & Missouri Bridge Co. was incorporated in the interest of the C. & E. Ill. to build a bridge across the Mississippi River, at or near Thebes, at an estimated cost of $1,500,000 or $2,000,000.—V. 71, p. 1219.

In 1897 the total issue of gen. consol. bonds was limited to $30,000,000 and bonds were reserved for Chicago & Indiana Coal firsts. See V. 64, p. 1088. Chicago Great Western.—(Concluded.)

History.—The Chicago St. Paul & Kansas City was organized in May, 1886, and in December, 1887, merged with Minnesota & Northwestern. In August, 1892, reorganized per plan, Vol. 55, p. 856. Each $1,000 of Minn. & N. W. and Chi. St. P. & K. C. first mort. bonds was given $500 debenture stock and $600 pref. "A" stock.

On Sept. 7, 1893, the Great Western acquired by deed the title of the Chicago St. Paul & Kansas City Ry. (815·67 miles), subject to the mortgage bonds, of which it owns all except $1,000. It also acquired the title to the Leav. & St. Joseph Ry. (23 miles), which is unencumbered.

Securities.—The holders of *debenture* and *preferred A* stock appoint the finance committee, which exercises general supervision of finances. Additional securities of said issues can be put out, but only with consent of a majority of both said classes of stock present at a meeting. Securities of other issues having a lien prior to preferred A can be created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock and of the trust deed were fully set forth in the editorial article of the Supplement for October, 1897; see also V. 71, p. 441.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000 for future refunding and improvements. See General Finances below.—V. 66, p. 133, 663, 1088.

Cash interest resumed on all debenture stock and *all* the preferred "A" is entitled to cash dividends since July 1, 1899.—V. 67, p. 1206.

Dividends.—On pref. "A" paid Jan., 1899, 2 p.c.; in July, 1899 2 p. c.; in Jan., 1900, 2½ p. c.; July, 2½ p. c.; in Jan, 1901, 2½ p. c.

Finances.—The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund the Ch. St. P. & K. C. priority loan (the only mortgage debt), which was paid Jan. 1, 1900, and then outstanding lease warrants and sterling notes, of which stock there remained unissued Jan., 1901, $2,700,000, to provide for paying sterling notes and lease warrants maturing, additions and improvements. By improvements of the permanent way, etc., operating expenses were reduced in 1899-1900 to 66·81 per cent of earnings, against 70·13 per cent in 1897-8 and 77·47 in 1894-5. —V. 71, p. 441.

Indebtedness June 30, 1900, $5,246,744, including $1,309,623 car trusts and $3,957,121 loans, all retirable at maturity from proceeds of debenture stock already authorized.—V. 71, p. 442.

The main line of the Wis. Minn. & Pac., extending from Red Wing, Minn., to Mankato, 93·7 miles, purchased from the Chic. R. I. & Pac. by friends of the C. G. W. has been operated since June 1, 1899, in connection with the latter, but the earnings kept separate. V. 68, p. 976. The W. M. & P. Ry. in Oct., 1900, made a $2,000,000 mortgage to the Mercantile Trust Co. of New York, as trustee.—V. 71, p. 751.

HISTORY, &C.—The Milwaukee & St. Paul RR. Co. was organized May 5, 1863, and on Feb. 11, 1874, took its present name. The system has since been greatly extended by the construction and acquisition of other lines. The sale of the Milwaukee & Northern to the St. Paul was ratified in September, 1893. In July, 1899, the Des Moines Nor. & West, 147 miles, was merged. V. 71, p. 494. Late in 1899 extensions from Rockwell City to Storm Lake, Iowa, 39 miles, and Fonda, Iowa, to Spencer, 44 miles, were opened, and extension of Libertyville line to Fox Lake, Ill., 20 miles, was completed in Sept., 1900, and being extended to Janesville, Wis., 40 miles. The stockholders voted Sept. 23, 1899, to merge by consolidation the leased lines in Illinois. V. 69, p. 228, 694. In Sept., 1900, arranged with the Northern Pacific for trackage from St Paul to Duluth V. 71. p. 236, 603. Extension from Bowdle, S. D., west to Evarts, 41 miles, and Napa, S. D., northwest to Platte, 82 miles, completed in Oct., 1900. In Oct., 1900, acquired Milwaukee & Superior Ry., Granville to North Lake, Wis., 21 miles.

CAPITAL STOCKS.—The preferred stock has a prior right over the common stock to a dividend of not over 7 per cent from net earnings in each year, but if not earned it has no cumulative right. After payment of 7 per cent on preferred and 7 on common, both classes share *pro rata*. Common stock authorized, $47,062,560. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $5,000,000 having been issued for other purposes (improvements, etc.) In July, 1900, $10,718,500 prior lien bonds outstanding were exchangeable for preferred.

BONDS.—Abstracts of some of the older mortgages were published in the CHRONICLE, V. 45, pp. 85, 114, 144, 212, and V. 48, p. 830.

The following bonds are *convertible into preferred stock* at any time within ten days after a dividend shall have been declared and become payable on the preferred: Iowa & Dakota Extension 7s, River Division 7s, Chicago & Milwaukee 7s of 1903, Hasting & Dakota 7s of 1903 and Ch. Mil. & St. P. consols of 1875. The consols of 1874 also are convertible into preferred within 15 days after dividend day. The convertible bonds were fully described in SUPPLEMENT for Mar.'93, p. 2.

Chicago & Pacific Western Division 1st 5s were issued at $20,000 per mile for road, with additional amounts for equipment and bridges; no further bonds can be issued. The mortgage covers the following miles of road: Farley, Ia., to Kansas City, Mo., 341 miles; Marion, Ia., to Council Bluffs, Ia., 262 miles; Astor, Ia., to Aberdeen, North Dak., 352 miles; branches 162 miles; total, 1,117 miles.

Terminal five per cent bonds of 1884 cover terminal property of several hundred acres in Chicago and Milwaukee.

The *general mortgage* of 1889 (see **abstract** in V. 48, p. 830) is for $150,000,000, to the United States Trust Co., of New York, as trustee, and covers the entire railway property and franchises of the company (therein described) subject to prior liens as below mentioned. The prior lien bonds cannot be extended, but will be paid off at maturity.

On June 30, 1900, the following amounts of general mortgage bonds had been issued or were reserved for the purpose indicated, viz:—

Listed on New York Stock Exchange.....	$26,176,000

Total reported by the company as outstanding.....	$33,978,000

Available or eventually to become available for improvements, there being included in this amount the bonds originally reserved for prior liens, which have since been converted into pref. stock.....	26,099,000
Total authorized.....	$150,000,000

The $33,978.000 outstanding include $6,000,000 issued to pay for 178 miles of sundry small branches on which the general mortgage is a first lien, and to retire the $2,500,000 first mortgage bonds of Chicago Evanston & Lake Superior Ry., a Chicago suburban road, also $4,524,000 issued to replace prior bonds paid and canceled.

On July 1, 1900, of the prior lien bonds outstanding, $10,718,500 were convertible into preferred stock; if from time to time so converted they will set free a like amount of general 4s which, with those reserved against bonds already converted, will become available for improvements, additions, etc., as soon as the balance ($3,110,000) of the amount originally reserved for improvements has been so expended. V. 48, p. 830; V. 50, p. 205. N. Y. Stock Exchange to Jan., 1901, had listed $26,176,000 generals—see "General Finances," V. 65, p. 462, and V. 66, p. 335.

GENERAL FINANCES, &C.—Capitalization per mile of road June 30, 1900: Stock, $13,639; bonds, $20,419; interest charge, $1,063. Dividends on common stock were resumed in October, 1892. See "dividends" above.

The funded debt was increased during the year 1899-00 by the issue of $295,000 of general mortgage bonds and was decreased $5,374,500 by underlying bonds retired and canceled; of the latter $4,859,500 were converted into preferred stock and $223,000 into common stock. Of the funded debt there was in the treasury June 30, 1900, $8,891,000 (against $8,596,000 June 30, 1899), of which $7,478,000 was general mortgage 3½s and $324,000 gen. M. 4s. In Nov., 1900, $3,000,000 of the 3½ per cent general 3½s held in treasury were sold. —V. 71, p. 1119.

Average freight train load in 1899-00 was 205 tons; rate per ton per mile, 0·930c.; in 1898-9 train load, 187 tons; rate per ton per m. 0·937c.

In Sept., 1900, the decreased cost of improvements was expected to offset the decrease in gross earnings, leaving the net earnings for 1900-1 about the same as last year. V. 71, p. 645.

The authorized issue is $165,000,000 (United States Trust Co., trustee). $131,640,000 are reserved to retire underlying bonds, and remainder for additions and improvements, $4,000,000 at once and $1,000,000 a year thereafter. The bonds may be issued bearing such rate of interest as shall be deemed advisable. See V. 65, p. 1070. The first issue of $20,000,000, bears 3½ per cent (reg. interest Q.—F., coupon M.&N.). V. 65, p. 69, 111, 571. Up to Jan., 1900, $11,507,000 had been listed. V. 67, p. 125; V. 72, p. 86.

The *sinking fund bonds* of 1879 are secured by deposit in trust of $15,000,000 of 1st mortgage bonds at $15,000 per mile on subsidiary lines, the most important being described in SUPPLEMENT of May, 1894. Of the sinking fund bonds of 1879 $6,069,000 are 6s; the sinking fund is at least 1 per cent of outstanding bonds, which are subject to call at 105; and through its operation the amount outstanding has been reduced from $15,000,000 to the present figure.

The *sinking fund debentures* of 1933 have a sinking fund of $200,000 per year, if they can be redeemed at 105. These, as also the *debentures* of 1884 and 1891, will be secured by any future mortgage excepting any mortgage "for the enlargement, improvement or extension of the company's property." See description of all the debentures on page 2, SUPPLEMENT of April, 1895. The 25-year debenture mortgage of 1884 was for $6,000,000, but reduced by sink. fund purchases.

The *extension bonds of* 1886 are secured by deposit in trust of first mortgage bonds at a rate not exceeding $20,000 per mile. Included in the collateral June 1, 1896, were $10,675,000 Fremont Elk Horn & Mo. Valley 1sts and $2,560,000 Wyoming Central 1sts [the Wy. Cent. having been consolidated with F. E. & M. V.], etc. To Aug., 1900, Extension 4s for $18,632,000 had been listed on N. Y. Stock Exchange, of which, June 1, 1900, $1,143,000 were held alive in sinking funds. See F. E. & M. V. bonds below. Union Trust Co. of N. Y., trustee.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.

The *Milwaukee Lake Shore & Western* debentures of 1887 were by their terms convertible into M. L. S. & W. stock, but North Western officials state that the bonds are not convertible into North West stock.

The Boyer Valley Minnesota & Iowa, Boone County Mankato & New Ulm, Minneso a & South Dakota and Iowa Minnesota & Northwestern bonds were assumed in June 1900, the roads being absorbed upon completion. See V, 71, p. 28, 291, 294, 340.

LAND GRANT.—Lands and lot sales in 1899-00, $834,218; net cash receipts, $599,387; lands unsold and uncontracted for May 31, 1900, 600,871 acres.

GENERAL FINANCES.—The first issue of ($20,000,000) refunding bonds at 3½ per cent interest was sold to provide for $18,015,500 old bonds maturing up to Dec. 1, 1902. If the entire issue of $20,000,000 is required to refund these old bonds the saving in interest charges will be about $530,000 per annum—see "bonds" above and V. 65, p. 69, 111. Maple River first 7s for $402,500 fell due July 1, 1897. In Jan., 1901, $9,680,000 old bonds had been exchanged for gen. 3½s, leaving $27,962,000 still outstanding. See V. 72, p. 86.

In 1899-00 the average freight train load was 235 tons, against 208 tons in 1898-9; rate per ton mile, 0·83 of a cent.

EARNINGS.—For 11 mos. ending Nov. 30, $39,245,501 gross in 1900, against $38,145,213 in 1899.

ANNUAL REPORT.—Fiscal year ends May 31. The annual meeting is held the first Thursday in June. The report for 1899-00 was given at length in V. 71, p. 284, 291. See also editorial, p. 262.

General Finances.—On May 9, 1899, the stockholders voted to set aside every year, as a sinking fund to retire stock and bonds and guaranteed securities, an amount equal to at least five cents per ton of coal sold or $175,000 to $200,000 per annum, to be charged against income account each year. (V. 68, p. 926. See ordinance in full, V. 68, p. 1180. Examination in 1898 showed tons of coal owned in fee by company, 165,186,393; tons of coal under lease, 58,361,400; total, 223,547,793. In 1898 sold the stock of the Rutland RR. at cost and 4 per cent interest, payable Jan. 1 and July 1, on account of which $335,000 cash has been received, and the balance, about $1,165,000, was paid on Dec. 1, 1900.—V. 68, p. 184. In 1900 $200,000 stock was retired from proceeds of the sinking fund. V. 70, p. 379.

History, Etc.—This is one of the most important of the anthracite coal roads. No sub-companies (coal and mining) are controlled, the railroad owning its mines. Original company chartered in 1832; present title assumed in 1853. Its leased lines are mostly held under long leases, and the system is compact. In 1894 representatives of the Vanderbilts entered the directory. See V. 57, p. 721 The Bangor & Portland Ry., 38 miles, was purchased in July, 1900, for, it was stated, about $2,000,000, and will probably be merged.—V. 71, p. 134.

Finances.—The refunding of Morris & Essex bonds maturing prior to Nov., 1902, will reduce the guar. interest charges of the latter about $200,000 yearly; Warren RR. refunding in 1900 and 1905 will reduce charges about $50,000 annually.—V. 70, p. 477; V. 71, p. 1066.

N. Y. Susquehanna & West	236

HISTORY.—On Dec. 1, 1895, succeeded to the property of the old New York Lake Erie & Western RR. Company, sold in foreclosure on Nov. 6 under its second consolidated mortgage. The new company holds in fee or through ownership of all or practically all the stock of the independent companies, the line from New York to Chicago (including the Nypano RR. and Chicago & Erie companies) and also all branch and subsidiary lines except a few small properties. The reorganization plan of 1895 was in V. 61, p. 368.

In January, 1898, control of the N. Y. Susquehanna & Western was obtained. The road is operated as an independent line.—V. 66, p. 83, 335, 573, and editorial p. 53. See STOCK below.

In Dec., 1900, a majority of the stock of the Pennsylvania Coal Co. was acquired, the purchase including the Erie & Wyoming Valley RR., Scranton, Pa.. to Lackawaxen, 64 miles, 48 miles of gravity road with terminus at Hawley, Pa., and the Hawley branch, 13 miles, leased to the Erie. See BONDS below.—V. 71, p. 1219. 1311; V. 72, p. 44, 136.

COAL AND STEAMBOAT PROPERTY.—The *Erie* coal properties represent an aggregate of 10,500 acres of anthracite, of which about 9,000 acres are held in fee; also 53,000 acres of bituminous coal lands held in fee 14,000 acres of bituminous held under mineral rights. Its coal tonnage in the year 1899-00 aggregated 12,701,256, out of the 26,947,892 tons hauled. The Union Steamboat Co. has its terminal and other properties in Buffalo and a fleet of eight lake steamers. See V. 63, p. 514. The *Pennsylvania* coal properties acquired in 1900 are additional. See above.

STOCK.—The *stock* is to be held by J. Pierpont Morgan, Louis Fitzgerald and Charles Tennant, Bart., voting trustees, for five years, and thereafter until the new first preferred stock shall have received 4 per cent cash dividend in one year. The new company reserves the right to redeem either class of its preferred stock at par in cash. Provisions of voting trust and preferred stock certificate were given in SUPPLEMENT of April, 1897, page 3.

In Mar., '98, Erie 1st pref. stock was increased from $30,000,000 to $43,000,000, and common stock from $100,000000 to $113,000,000, to acquire New York Susq. & Western stock.—See V. 66. p. 335, 573. The 1st pref stock will be further increased in 1901 $5,000,000 in connection with the purchase of the Pennsylvania Coal Co. - V. 72, p. 136.

BONDS.—New York & Erie first 7s for $2,482,000, due May 1, 1897 were extended for 50 years at 4 p. c., payable p. & i. in gold. V. 64, p 180, 1040. The new first consolidated mortgage is for $175,000,000 [Farmers' Loan & Trust Co. trustee]—see **abstract** of deed V. 62, p. 89 and secures $35,000,000 prior lien bonds and $140,000,000 general lien bonds. Of the *prior lien bonds*, $5,000,000 were to be used for improvements.

Of the $140,000,000 *general lien bonds*, $91,003,000 are reserved for the ultimate acquisition of all bonds and guaranteed stocks now left undisturbed on various parts of the system [excepting the $1.000,000 seconds on Buffalo & Southwestern—see list V. 62, p. 89], and $17,000,000 are reserved for new construction, betterments, additions, etc., after 1897, under carefully guarded restrictions, not over $1,000,000 to be used in any one year.

The position of the first consolidated mortgage is substantially as follows: It is a first lien, either by mortgage or collateral trust [the prior lien bonds, however, preceding the general lien bonds] upon the company's principal coal properties, upon its water transportation lines, including valuable terminal properties appurtenant thereto, and upon a number of profitable local lines in New Jersey and near Buffalo; it is a *second lien* upon the remaining coal properties and upon the railroads leading to all the coal properties, upon the terminals at Jersey City, upon the Buffalo New York & Erie Railroad (the main line to Buffalo) and the Buffalo terminal properties other than those upon which it is first lien, and upon the entire line from Salamanca to Chicago; it is a *second consolidated mortgage* upon the lines between Piermont and Dunkirk (446 miles.)

The collateral trust 4s of 1901 will be secured by 51 per cent of the entire New York Susquehanna & Western stock ($26 000,000 total issue), at least a majority of the Pennsylvania Coal Co stock, and the stock of the Erie & Wyoming Valley RR., Scranton, Pa., to Lackawaxen, 64 miles, and the Delaware Valley & Kingston RR. About $32,000,000 will be issued to acquire the stocks pledged (excepting the N. Y., Susq. & West., already owned), at least $4,000,000 to be reserved for improvements to the properties represented by the stocks acquired. V. 71, p. 1219, 1311; V. 72, p. 44, and circular, p. 136

Real estate mortgages outstanding Oct., 31, 1900, $430,725.

Old Bonds—Under the first consol. mortgage of 1895 the company covenants to pay the interest regularly on all the old bonds in the table that are marked with a * or a ‡ (except N. J. & N. Y. bonds,) and to take them up and pledge them with the trustee at maturity.

Long Dock 6s see March, 1894, SUPPLEMENT under N. Y. L. E. & W. For *N. Y. Lake Erie & W. Coal & RR.*, see SUP. January, 1895.

The $1,777,990 equipment trusts of 1900 cover 1,000 steel freight cars and 50 consolidated freight locomotives.—V. 70, p. 279.

FIXED CHARGES.—The fixed charges of the System were reduced by the reorganization from $9,400,000 to $7,860,000 per annum.

GENERAL FINANCES.—Control of the Northern RR. of New Jersey was purchased in July, 1897. Control of the New York Susquehanna & Western—which see—was acquired in 1898 through an exchange of stock. V. 66, p. 335, 573. To Nov.. 1, 1900, $3,452,000 of $5,000,000 prior lien bonds reserved for construction and new equipment were sold; also $1,903,000 general lien bonds issued for construction, etc.—V. 71, p. 754, 1219. The $255,505 car trusts of 1900 cover 544 box cars, and are payable in quarterly instalments.—V. 71, p. 863.

The purchase of the control of the Pennsylvania Coal Co. late in 1900 removed the possibility of an independent anthracite coal line to tidewater. The acquisition will be financed by the issue of about $32,000,000 collateral trust 4 per cent gold bonds and $5,000,000 first pref. stock.—V. 71, p. 1219, 1311; V. 72, p. 44, 136.

An extension was built in 1898 between Fosston and Duluth, 230 miles. In Nov., 1900, extension from Wenatchee, Wash., northeast to Republic, 153 miles, was proposed. As to Kootenai Ry. & Navigation, see V. 71, p. 341. The Cascade Tunnel was opened for traffic on Dec. 21, 1900.—V. 71, p. 1269.

Stock, Leases, Etc.—This corporation in February, 1890, leased the St. Paul Minneapolis & Manitoba for 999 years, assuming its funded debt and guaranteeing 6 p.c. per annum in gold on its $20,000,000 stock.

In 1898 $25,000,000 new Great Nor. preferred, raising the total capital stock to $50,000,000, was offered to stockholders, $15,000,000 of this being sold at par to provide for retirement of $15,000,000 col. tr. 4s of 1892, called for redemption Sept. 1, 1898, and $10,000,000 being exchanged for the $12,500,000 stock of the Seattle & Montana RR., which in June, 1898, was distributed as a 50 per cent dividend.

In October, 1898, the stockholders surrendered the right to issue $20,000,000 common stock in addition to the $50,000,000 preferred then outstanding, and made all the stock "of a single class, with uniform rights and privileges." Also authorized the purchase of the $20,000,000 of guaranteed 6 per cent stock of the St. Paul Minneapolis & Manitoba, on the basis of $125 Great Northern stock for each $100 Manitoba stock, thus increasing the Great Northern stock to $75,000,000. In Oct., 1900, $24,417,250 of the increased stock had been issued, leaving not over $466,200 of the Manitoba stock unexchanged.—(V. 68, p. 129; V. 67, p. 1356; V. 67, p. 370, 788, 842.)

In April, 1899, $15,000,000 additional preferred, raising total to $90,000,000, was offered to stockholders at par, to acquire all the bonds, debentures and stock of the Spokane Falls & Nor. Ry., Nelson & Ft. Sheppard Ry, Columbia & Red Mtn. Ry. and Red Mtn. Ry., and $7,500,000 new stock of East Ry. of Minn. V. 68, p. 772, 822, 1181.

In Jan., 1900, $9,000,000 additional stock was sold at par to stockholders to acquire $3,500,000 further stock of the East Ry. of Minn. and $5,500,000 stock of the Willmar & Sioux Falls Ry., issued for purchase of Sioux City & Northern and Sioux City & Western. V. 71, p. 655. In May, 1900, $1,000,000 stock, raising the amount to $100,000,000, was offered to Employes' Investment Co., Limited, which will hold it for benefit of employes.—V. 71, p. 654.

Lands.—Land sales in April, 1897, had retired all the 1st mort. bonds and were then applicable to consol mort. of 1883.

Sales for year ending June 30, 1900, were 92,217 acres for $847,208 and 1,484 town lots for $28,208. The net amount due on land contracts June 30, 1900, was $1,990,922; lands unsold, 1,156,606 acres, to be reduced about 600,000 acres by a final adjustment of the grant by the Government.

Minneapolis & St. Cloud grant was 476,864 acres; unsold July 1, 1900, 381,920 acres; sales in 1899-00 were 21,206 acres, for $187,596.

V. 64, p. 518. *Montana Extension* mortgage is for $25,000,000 for extensions and for second track. **Abstract** V. 45, p. 342.

Pacific extension mort. £6,000,000 provides for bonds at £6,000 per mile in Montana and £7,000 per mile west of Montana; £3,000,000 of this issue, in addition to those given in the table above, were pledged to secure the Great Northern's collateral trust bonds, but were released upon payment of the latter, called for redemption on Sept. 1, 1898. V. 66, p. 1041, 1188. See **abstract** of mortgage, V. 52, p. 82.

Eastern Railway of Minnesota runs from Hinckley northward 70 miles, to a point near Duluth; the first mortgage covers road, equipment, terminals and elevators. The Northern Div. $15,000,000 mortgage of 1898 provides for extension building from Fosston, Minn., to the head of lake navigation at Duluth, and also for future requirements, including the retirement of the $4,700,000 1st 5s at maturity. They are redeemable at 105 on three months' notice after Apr. 1, 1928.—V. 66, p. 471. *Montana Central* bonds cover several roads. (See adv. Chron. Dec. 12, 1891.) The Manitoba guarantees these issues, and the Great Northern assumes the guaranty.

The *Willmar & Sioux Falls* bonds are endorsed with joint and several guaranty of the Manitoba and Great Northern companies. Further issues may be made at $17,500 p. m. for additional road. V. 56, p. 247. *Minneapolis Western* first mortgage is for $1,000,000. V. 60, p. 835.

The consol. mortgage of 1897 (United States Trust Co., N. Y., and John T. Dye of Indianapolis, Ind., trustees,) is for $50,000,000 of 3½ per cent gold bonds, tax free, authorized to retire the several issues of 7s maturing from 1898 to 1903 (see **abstract** in V. 64, p. **1182**) amounting to $43,192,000, and the balance, $6,808,000 for use in refunding said bonds and for general purposes of the company. The mortgage covers 829·54 miles of main line and branches—a considerable portion being double tracked—and 181·11 miles of leased lines. The refunding of the first 7s into new 3½ per cent consols will effect a saving in interest charges, when entire $50,000,000 are outstanding, of $1,273,440 a year. See refunding plan in V. 64, p. 469, 610, and also V. 66, p. 82; V. 67, p. 956. To Oct., 1900, $40,760,000 of 3½s had been listed.—V. 66, p. 1140; V. 68, p. 1182.

GUARANTIES.—As to guaranties additional to those shown in table above see Detroit Hillsdale & S. W. and Fort Wayne & Jackson.

GENERAL FINANCES.—Nothing has been charged to construction or equipment account since 1883, the outlays charged to operating expenses for new equipment amounting in 1899 to $1,865,817, and in 1898 to $699,516 and for construction to $234,073 in 1899, against $108,-908, these items being exclusive of expenditures for renewals. Profit and loss surplus Jan. 1, 1900, $8,389,482. Low grades permit large train loads; average for 1899, 427 tons, against 352 in 1898.

In Dec., 1900, $36,551,000 of the $43,192,000 7 per cents due in 1903 and earlier, and outstanding in June, 1897, had been retired and $40,760,000 new 3½s issued, thus reducing fixed charges $1,131,970 per annum, or over 2 per cent on the capital stock.

In Feb., 1898, a majority of the capital stock was purchased by the N. Y. C. & H. RR., which gave in exchange its 3½ p. c. bonds at the rate of $200 in bonds for $100 in stock, and offered to take the minority interest on the same terms. V. 66, p. 288. Illinois Central from Kensington into Chicago, 14 miles, under a perpetual lease. Control of the road was acquired by the N. Y. C & H. R. RR. Co. in April, 1898, as stated below.

CANADA SOUTHERN CONTRACT.—In Nov., 1882, a close contract was made with Can. So. for the operation of its road. The contract provided for a re-apportionment every five years and in the re-apportionment December, 1892, it was agreed that the Canada Southern should thereafter receive 40 per cent and the Michigan Central 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided as theretofore—one-third to C. S. and two-thirds to M. C.; but under the original contract each company is accorded all benefit from reduction in its fixed charges. The M. C. to Jan. 1, 1899, had reduced its charges $328,575; this sum is therefore credited to it before the division.

CAPITAL STOCK.—The stock has remained at same amount since 1895.

BONDS.—The *Jackson Lansing & Saginaw bonds* were assumed by Michigan Central, which also guarantees in perpetuity 3½ per cent on the stock. The *Bay City & Battle Creek* mortgage is for $1,800,000, but amount outstanding is limited to $15,000 per mile. The total issue of *Battle Creek & Sturgis* bonds is $500,000, but of this $79,000 was sub-guaranteed by the Lake Shore & Michigan Southern, 7 miles of the B. C. & S. being operated by that company. The Bay City & Battle Creek and the Battle Creek & Sturgis issues both carry the guaranty of the Michigan Central endorsed on the bonds.

OPERATIONS, FINANCES, &C.—The earnings of Can. So. are included in the statistics below. As to division of profits between the companies, see explanation V. 64, p. 5. All betterments and improvements to the road have been charged to operating expenses, except $70,000 set aside out of net revenue of 1898 as a special fund for 2d tracks.

N. Y. C. & H. R. RR. Co. in '98 gave in exchange its 3½ per cent 100-year gold bonds at the rate of $115 in bonds for $100 in stock. V. 66, p. 759. In Dec., 1900, $16,435,500 of the $18,738,000 stock had been acquired by the N. Y. C. & H. R. RR. V. 66, p. 1238.

New York Central & Hudson River RR.—(*See Map.*)—

HISTORY, &C.—Control of the Lake Shore and Michigan Central roads was acquired in 1898, as stated below. In 1899-00 their earnings were reported separately, but the $3,827,521 dividends on their shares held by the Central chiefly caused the large increase in "other income," compared with 1897 98, offset by a like amount of interest on the collateral bonds issued for their purchase. V. 71, p. 502.

In Jan., 1900, control of the Lake Erie & Western was acquired, also a large interest in the Cleve. Cin. Chic. & St. Louis, increasing the Vanderbilt interest in the latter to an absolute majority. The Central has since transferred its holdings in these companies to the Lake Shore, which see. In 1900, also, an understanding was reached between the Vanderbilt and the Pennsylvania interests, by which the latter became jointly interested in the stock of the Ches. & Ohio Ry.—V. 70, p. 76, 125, 1049.

BONDS.—Description of debentures was on page 3 of SUPPLEMENT of April, 1895. They are all secured by the refunding mortgage of 1897 equally with the 3½s. *Ref. mortgage* is for $100,000,000, of which $70,377,333 reserved to retire all existing bonds at or before maturity and $14,622,667 for premiums; the remainder ($15,000,000) is reserved for new construction after 1903. In 1900 3½s of 1897 had been issued to retire about $31,000,000 of old bonds.

Collateral trust 3½s of 1898 are secured respectively by deposit in trust with the Guaranty Trust Co., mortgage trustee, of stock of the Lake Shore & Michigan Southern and Michigan Central RRs. at the rate of $100 of L. S. & M. S. stock for each $200 of bonds and $100 of Mich. Cent. stock for each $115 of bonds outstanding. The total authorized issues of 3½s are $100,000,000 for Lake Shore and $21,550,000 for Michigan Central. The loans are secured by separate deeds of trust. See V. 66, p. 288, 336, 760, 811.

The N. Y. Cent. issued in 1900 $5,500,000 in its 100-year 3½ per cent debentures for certain property not included in the Boston & Albany lease. See V. 69, p. 1102; V. 71, p. 502, 964.

GUARANTIES.—The company guarantees the securities of its leased lines to a considerable aggregate—see separate statement for each company marked with a ¶ in the table of mileage preceding. It also guarantees Western Transit Co. 4½s for $1,000,000 due February, 1903.

GENERAL FINANCES.—The refunding of the $70,377,000 of old high-interest-bearing bonds into the 3½s of 1897 during the years 1898 to 1905 will effect a saving of $1,200,000 per annum in interest charges; to June 30, 1900, $30,671,479 old bonds had thus been retired; saving in charges by refunding in 1899-00, $512,776.—V. 71, p. 502.

In Dec., 1900, the company had acquired $45,289,200 of the capital stock of the Lake Shore road in exchange for 3½ p.c. bonds (see above), leaving $4,177,300 afloat, including $533,500 guaranteed 10 per cent dividends (see V. 66, p. 288, 336, 1238), and also $16,435,500 of Mich. Central stock, leaving $2,502,500 still outstanding.

On April 2, 1900, $15,000,000 stock, sold to stockholders at par, was issued for new equipment. V. 69, p. 906, 1103, 1248; V. 71, p. 502. On Nov. 10, 1900, Boston & Albany RR. was taken over under lease.

Average train load for entire system, including company's freight, was 398 tons in 1899-00, against 361 tons in 1898-9.

Loans and bills payable Sept. 30, 1900, $520,000.

GENERAL FINANCES.—Early in 1899, the coal properties at Scranton, Pa., of the Lack. Iron & Steel Co., (the capacity of the collieries then open being about 700,000 tons per annum) were purchased by the Scranton Coal Co., aided by loans from the N. Y. O. & W., the latter issuing its $2,500,000 5 p. c. notes (reduced to $2,450,000 in 1899-1900), extending over a period of years secured by first mortgage on the coal property, and loaning $1,475,000 (of which $305,000 has been repaid) secured by a second mortgage thereon, the O. & W. obtaining a contract for the entire tonnage. V. 68, p 41, 429. The coal companies are expected ultimately to take care of all the obligations created.—V. 69, p. 604, 646.

In November, 1900, eight independent anthracite properties with a maximum output of 2,000,000 tons annually were merged as the Elk Hill Coal & Iron Co., the N. Y. O. & W. issuing its $3,500,000 5 per cent sinking fund first lien gold notes secured by the Coal & Iron Company's first mortgage, these notes maturing $75,000 each 6 mos., beginning June 1, 1901, to June 1, 1911, and thereafter $200,000 semi annually to Dec. 1, 1915. In the event of any additional mortgages being placed on the railroad properties besides the refunding mortgage, the notes are to be secured pari passu with such new obligations. The Elk Hill Co. also made a second mortgage to the N. Y. O. & W. for $1,500,000 at 5 per cent. V. 71, p. 1270.

The company's coal tonnage is derived from the following sources: Scranton and Elk Hill companies (as above stated), total maximum capacity, 2,700,000 tons; other companies, 300,000.

Bonds.—The first consolidated mortgage of 1896 is limited to $62,500,000, of which an amount equal to the underlying bonds can be issued only on the retirement of the same. The balance is or was reserved as follows: For existing obligations, or to retire prior lien bonds if issued, $3,500,000; for new construction, acquisitions and improvements, not exceeding $1,000,000 yearly, $9,690,436.

The *new* 4 *per cent first consols* are (subject to the small amount of Prior Lien bonds which may be issued only in case of urgency) a first mortgage on a large part of the system, viz., upon 845 miles of railroad; upon important terminals at Norfolk and Lamberts Point; upon the Ohio River Bridge and the Roanoke Machine Works; besides being a consolidated mortgage upon the remainder of the system, subject to the undisturbed liens. They are further secured by the equipment, certified to have cost over $11,000,000, covered by the Car Trusts and equipment bonds to be taken up under the plan. Undisturbed bonds which cannot be taken up at maturity on satisfactory terms by use of the consols reserved for that purpose may be extended or renewed. See **abstract** in V. 64, p. 376.

General Finances.—The reorganization reduced the fixed charges from $3,214,037 to $2,218,450, a reduction of $995,587; liquidated floating debt and took up car trusts except those of 1892 and 1893. The annual charges ahead of the new common stock are smaller than those ahead of the old preferred stock. Of the company's traffic in 1899-1900 55 per cent (5,989,577 tons) was bituminous coal and coke.

In March, 1899, $5,000,000 1st consol. 4s were sold, of which $1,500,000 to be used for betterments, double-tracking and additional

In Oct., 1900, Reading Belt Ry., 7½ miles, was under construction, its $750,000 stock being owned and its $750,000 bonds to be guaranteed. V. 71, p. 758. In Jan., 1901, control of the Central RR. of New Jersey was acquired. V. 72, p. 86.

ORGANIZATION.—The Philadelphia & Reading RR. (chartered April 4, 1833) and the P. & R. Coal & Iron Co. were sold in foreclosure Sept. 23, 1896, and reorganized per **plan** in V. 61, p. 1109.

In the reorganization the 41 millions of old stock and the 56¾ millions of old preference income bonds were assessed 20 per cent, the stock then receiving 100 per cent in new common and the preference incomes, common and preferred stock in certain proportions.

The "Reading Company" in the reorganization acquired the security holdings, real estate, equipment, etc., of the old Phila. & Reading RR. Co.; also $20,000,000 stock and $20,000,000 bonds of the Phila. & Reading Ry. and the $8,000,000 stock of the Coal & Iron Co., and against all this property issues its own securities. See V. 64, p. 709.

The property of the Reading Company, as distinguished from the property of the Phila. & Reading Ry. Co. (which owns the railroad but no equipment), and the Coal & Iron Co., consists of the following:

Railway equip. leased to Ry. Co. for 8 p. c. yearly.....	$18,183,212
Real estate not appurt. to RR. (ann. revenue ab't $175,000).	16,427,074

Claims against other companies, etc.....	4,066,571
Total July 1, 1900. (See V. 71, p. 760).....	$210,689,827

VOTING TRUST, ETC.—All classes of stock of the new company are to be held by voting trustees (J. Pierpont Morgan, Frederic P. Olcott and C. S. W. Packard) for five years, and thereafter until 4 p. c. cash dividend per annum shall be paid on the first preferred stock for two consecutive years, though the trustees may in their discretion surrender the stock at an earlier date. The company may, after dividends of 4% have been paid on the first preferred for two consecutive years, convert the second preferred stock into one-half first preferred and one-half common stock. As to rights, see V. 64, p. 709. **Voting trust**, V. 64, p. 955, and SUP. of April, 1897, page 5.

SINKING FUND.—Whenever, in any year, a dividend is paid on the stock, an amount must be paid simultaneously to the trustee equal to 5 cents per ton on all coal mined by the Coal & Iron Company during the preceding year, if the aggregate of dividends so declared exceeds that sum; otherwise such lesser sum as shall equal the dividends so declared. Under this provision $383,525 was set aside in Mar., 1900, and $433,000 bonds canceled and about the same amount on the declaration of the Sept., 1900, dividend.—V. 71, p. 759.

DIVIDENDS.—First semi-annual dividend on 1st preferred 1½ p. c., paid March 8, 1900; Sept. 10, 1900, 1½ p. c.—V. 71, p. 288.

BONDS.—The *New General Mortgage* 4s (**abstract** V. 64, p. **612**) are secured by mortgage and pledge of all properties and securities embraced in the reorganization, and also all other property acquired thereafter by use of the new bonds. They will have a sinking fund out of the revenues from the Coal & Iron Company, but are not subject to compulsory redemption prior to maturity. The new mortgage is also, subject only to the bonds for which reservation is made, based upon properties or securities of all the lines of railroad owned, including the Philadelphia & Reading Railway Company proper, 365 miles; various leasehold lines, 635 miles; all the property of the Coal & Iron Company, or the securities thereof, representing nearly 200,000 acres of coal and timber land; equipment valued at about $18,000,000, and also the marine equipment.

Furthermore, it has a first lien upon a majority of the capital stock of various companies in the system owning 453 miles of railroad, and also on various bonds of roads in the system. The securities are said to have earned in 1894-95 an income of $585,000, of which $448,000 was received as dividends—list in V. 64, p. 613

Of the $135,000,000 fours of 1897 $51,692,500 are reserved to take up undisturbed bonds and $17,000,000 for future construction, equipment, etc., at not over $1,500,000 per annum.

Improvement mortgage 6 p. c. bonds of 1873 due Oct. 1, 1897, were extended at 4 p. c. for 50 years from April 1, 1897, payable in U. S. gold and guaranteed p. & i. by the Reading Co. V. 64, p. 470; V. 65, p. 516. The *consol* 5s of 1882 for $5,673,042 were also extended at 4 p. c. till Mar. 1, 1937, the Reading Co. and Coal & Iron Co. becoming responsible. See V. 65, p. 870, for contract. V. 65, p. 152, 870.

Terminal mortgage bonds, see V. 64, p. 85 and V. 60, p. 732.

For *ten-year sinking fund loan* see January, 1895, SUPPLEMENT.

The *coal trust certificates* under agreement of May, 1895, are not redeemable until April, 1904—see V. 63, p. 838 and Jan., 1895, SUPP.

The *Philadelphia Subway Loan* is payable after ten years from date in 20 annual instalments, to secure which $[illegible]00,000, bearing interest, has been deposited, and $100,000 yearly is being set aside in monthly instalments. See V. 58, p. 1110; V. 62, p. 950; V. 63, p. 881; V. 71, p. 758.

The $3,600,000 car trusts of 1899 cover 2,500 wooden coal cars, 1,000 gondola cars, 30 passenger coaches, 30 locomotives, 500 box freight cars and 200 refrigerator cars, the semi-annual payments being met from the renewal fund.—V. 69, p. 1346; V. 71, p. 759. In Dec., 1900, 2,000 freight and 30 passenger cars had been ordered, $2,500,000 car trusts to be issued therefor.—V. 71, p. 1312.

COAL PROPERTIES.—These aggregate about 194,000 acres, as follows:

Coal lands owned (acres)....	95,144	Timber lands owned (acres)	70,489

ORGANIZATION.—Organized under laws of Kentucky. Under plan for readjustment of Central Pacific securities, the Southern Pacific in 1899 acquired the entire capital stock of the Central Pacific. See that company's statement; also see below.

In Jan., 1900, Southern Pacific interests acquired control of the Galveston Houston & Northern, Houston to Galveston, 56 miles. In Feb., 1900, substantially all the stock and bonds of the Carson & Colorado were acquired and the road will be broad-gauged and eventually extended as a link in a new line made from Los Angeles, in Southern California, easterly towards Salt Lake, Utah. In Feb., 1900, practically all the stock of the Houston East & West Texas Ry. and Houston & Shreveport RR. were acquired.—V. 70, p. 176, 381, 687. In July, 1900, the Ogden & Lucin RR. was incorporated, with $1,000,000 stock, to build the proposed cut-off on the Central Pacific across the Great Salt Lake from Lucin to Ogden, Utah, 107 miles, a saving of 39 miles over the old line. V. 71, p. 85. In Nov., 1900, a majority of the Pacific Mail SS. stock ($10,005,000) was acquired. V. 71, p. 1013, 1312.

PROPRIETARY LINES.—These, with a total mortgage indebtedness June 30, '99, of $141,837,218, are mostly owned—only $7,464,283 out of their total stock of $185,772,072 not being held on July 1, 1898, by the Southern Pacific Co. "OMNIBUS LEASE," see SUP'T of Jan., 1899.

STOCK, ETC.—Total stock authorized, $200,000,000, including $67,274,200 exchanged in 1899 for Central Pacific stock—see Central Pacific and V. 68, p. 378, 725; V. 69, p. 132; V. 70, p. 740.

In June, 1900, the Speyer Huntington syndicate had obtained the holdings of the Crocker and Stanford estates, aggregating alone $56,000,000, which, together with other stock controlled by the syndicate and those friendly to it, including C. P. Huntington estate, represents a controlling interest. See directors below.—V. 70, p. 1250; V. 71, p. 391.

BONDS.—The fifty-year 4 per cent collateral trust gold bonds authorized by the Southern Pacific Co. in 1899, in connection with its acquisition of the stock of the Central Pacific, are for the total authorized amount of $36,819,000, and are subject to call at par on six months' notice. The first issue of $28,818,500, secured by the $67,274,200 common and $12,000,000 preferred stock of the Central Pacific, was issuable forthwith. The remaining $8,000,000 can be issued from time to time only as an equal amount of Central Pacific preferred is received and added to the collateral, $5,000,000 of this stock being reserved for improvements and additions on the Cent. Pac. at not exceeding $200,000 yearly—see Cent. Pac. and V. 68, p. 378. See Mortgage Abstract, V. 69, p. 859.

The new first refunding 4s and 30-year gold 3½s issued by the Central Pacific are unconditionally guaranteed, principal and interest.

The two-five-years collateral trust 4½s of 1900, limited to $30,000,000 (present issue, $15,000,000), are secured by deposit of $7,174,000 par value of various bonds and $59,487,000 stocks of companies controlled, including Pacific Mail etc., and $1,530,000 Wells, Fargo & Co. stock; other $15,000,000 is issuable against the deposit of additional stocks and bonds of companies controlled or acquired up to 90 per cent of the actual cost thereof. See Mortgage Abstract, V. 71, p. 1314.

GENERAL FINANCES.—The interest on funded debt for 1899-1900 will not be materially increased over that of 1898-9 by the C. P. readjustment. Interest charge in 1898-9 was $12,888,337; estimated charge for 1899-1900, after deducting $709,070 income on securities in Cent. Pac. sinking funds, primarily applicable to payment on Cent. Pac. 3½ per cent bonds, $13,347,820. Against the last-named amount the So. Pacific Co. will be entitled to any dividends on $12,000,000 Central Pacific 4 p. c. preferred and $67,275,500 common stock.—V. 70, p. 83.

On Dec. 10, 1899, a new line was opened from Columbia, S. C., to Savannah, Ga., about 160 miles, of which the Carolina Midland, Perry to Allendale, 52 miles, forms a part, the Co. building from Columbia to Perry, 31 miles, and using Atlantic Coast line and Plant system trackage from Allendale to Savannah, the latter being partly replaced by the construction of its own line from Allendale to Hardeeville, S. C., 80 miles, opened Dec., 1900, V. 71, p. 447. In Oct., 1900, extension from Burgin to Jellico, Ky., 115 miles, and other extensions were proposed, including one from Chattanooga, Tenn., to Stevenson, Ala., about 38 miles, under the charter of the Memphis-Chattanooga RR., for which $3,000,000 bonds were reserved under Mem. & Charleston first mortgage. V. 69, p. 956. The Louisville Evansville & St. Louis Consolidated RR. was taken over after foreclosure on Jan. 1, 1901. V. 70, p. 792, 1292; V. 71, p. 603; V. 72, p. 45. In Jan., 1900, the Ensley Southern Ry., substantially all of whose stock is owned, was building from Ensley, Ala., to Warrior River, 25 miles, on branch to Parrish, 35 miles. V. 71, p. 448.

Organization, Etc.—A reorganization in 1894 of the old Richmond & West Pt. Ter. Railway & Warehouse system. The reorganization **plan** presented in May, 1893, was given in full in V. 56, p. 858, 874, and certain changes thereof in pp. 1016, 1058, and V. 57, p. 61. The modified plan of Feb. 20, 1894, was given in full in V. 58, p. 363, 385.

As to Cincinnati New Orleans & Texas Pacific, see V. 65, p. 1173. On July 1, 1898, absorbed Memphis & Charleston.—V. 66, p. 39, 185.

Mobile & Birmingham RR. (149 miles) was leased from June 1, 1899, for 99 years.—V. 68, p. 429, 1134; V. 69, p. 391.

In Apr., 1899, purcha ed the Northern Alabama, Sheffield to Parrish, Ala., and branch, 119 miles (V. 68, p. 824, 873); also acquired control of and leased the South Carolina & Georgia.—V. 69, p. 390.

Atlantic & Danville has been leased for 50 years from July 1, 1899.

Stock.- Authorized $120,000,000 *common* and $60,000,000 *five per cent non-cumulative preferred stock.* No additional mortgage can be put upon the property, nor can the amount of the preferred stock be increased without the consent of holders of a majority of the preferred. The preferred stock is redeemable in cash at par. In Jan., 1900, reduction of the stock was authorized by the Virginia Legislature, on majority vote, whenever deemed desirable. V. 70, p. 177, 947, 1150.

Both classes of stock of the new company (except sufficient to qualify directors) are deposited with three stock trustees. The stock shall be held by the stock trustees and their successors, jointly till July 1, 1899, and for such further period (if any) as shall elapse before the preferred stock shall have paid five per cent cash dividend in one year, although the stock trustees may, in their discretion, deliver the stock at an earlier date. Certificates of beneficial interest, entitling the holder to dividends, are issued in lieu of the stock so deposited. Stock trustees, J. Pierpont Morgan, Charles Lanier and George F. Baker. Provisions of voting trust and pref. stock cert. in Sup. of April, 1897, page 6.

Dividends.—On preferred in 1897, Jan., 1 p. c.; in 1898, Jan., 1 p. c. in 1899, Jan., 1 p. c.; Oct., 1 p. c.; in 1900, Apr., 1½ p. c.; Oct., 1½ p. c

The total authorized issue is $8,000,000, but $1,500,-000 can be used only to build a line replacing trackage between Stevenson and Chattanooga, 38 miles. THE MURPHY THIRD-RAIL SYSTEM.

The trains of the Baltimore & Ohio Railroad Company pass through the city of Baltimore in a tunnel about one mile long and thence for two and a-half miles over the Belt Line, encountering curves and grades equal to a one-per-cent grade. At times it is necessary to pull a train of over thirty loaded freight cars with a heavy freight engine over this distance. In August 1895 electric locomotives taking current from an overhead conductor were installed to haul all east-bound trains over the above three and one-half miles, and thus obviate the nuisance of smoke in the tunnel and noise over the remainder of the line. As the west-bound trains are on a descending grade, they are controlled by their own locomotives without working steam. Because of the very large current which the conductor is required to deliver, the depreciation and cost of maintenance were so great that the railroad company decided to change to a third-rail system. After thorough investigation it decided to use the Murphy sectional third-rail.

The 96-tons electric locomotives, without doubt the heaviest in the world, have four 300 horse-power, gearless motors—the axles of the locomotives acting as armature shafts. The locomotives have a contact shoe at each end of both sides by either one of which the current can be taken from a third rail placed two feet outside of and parallel to the track rail, the ends at cross-overs being tapered so that the contact shoe can glide on to them smoothly. "Reconstructed granite" insulators, made by pulverizing natural granite, moulding it into shape and fusing, are placed on malleable iron cleats to support the third rail. These cleats are fastened to every fifth railroad tie, each one of which was previously pulled out seven inches.

The third rail is continuous in the tunnel, but where there would be danger to passengers it is divided into sections, each being operated by a 2,000-ampere switch placed near-by on the masonry. A novel and very important method has been devised to replace the storage battery, which on the Manhattan Beach, N. Y., system furnishes the current to pick up the switches. The windings on the electric motors of the locomotives in use on the Baltimore & Ohio Railroad with the overhead trolley system were changed so that the motor could act as a motor or as a generator, and two valves were added to the air-compressor used to operate the air-brake, to allow it to be used as an air-compressor or as an air-engine. The method of charging the third rail is as follows: The motorman moves the controller to the first notch, which admits compressed air into the air-engine from the air-brake storage reservoir and starts the electric generator. A current of about 550 volts is sent from the generator through the controller, the contact shoe and third rail to the switch, thereby raising a plunger which closes the switch and allows the power-house current of 750 volts to enter the third rail. This current keeps the switch closed until the contact shoe passes to the next section, when the plunger drops and that section is cut out of the electric circuit.

Thus only the section of the third rail under the moving train has a current passing through it. From the third rail the current goes through the contact shoe and controller to the four 300 horse-power motors, and also to the electric generator which controls the switch. The generator at once becomes a motor run by current from the power-house and, working the air-engine as an air-compressor, restores to the air-reservoir the amount of air which has been used to open the switch. By the above method of operating the current-switches no extra apparatus is required, and there is always an electro-motive force in store sufficient to control the operations. It is claimed that the combined compressor and engine will be no more expensive than the motor compressor commonly used for air-braking purposes.

The system was installed by the Murphy Safety Third-Rail Electric Company of Baltimore, Maryland, under the supervision of Capt. John McLeod Murphy, chief engineer, the inventor of the system,

and Mr. W. D. Young, electrical engineer of the Baltimore & Ohio Railroad Co. On January 31st of this year Captain Murphy said: "We have had several tests of the Murphy system on the Belt Line of the B. & O. RR., all of which have proven successful. One yesterday was made in quite a heavy snow storm, with ice all over the rails, and we successfully pulled twenty-eight loaded coal cars, a locomotive and caboose the entire length of the road, three and one-half miles. The switches opened, breaking twelve hundred amperes and seven hundred and fifty volts. The cost is very much less than either the overhead or conduit systems, and the cost of maintenance very much less than either. * * * The Belt Line of the B. & O. is the heaviest traction proposition in the world—750 volts, 4,000 amperes. The return circuit is carried by the traffic rails with the usual bonding. The Murphy third-rail system appears to be admirably adapted to deliver economically a large current and to insure immunity from accidents incident to a live electric conductor."

ABOLISHMENT OF GRADE-CROSSINGS AT CLEVELAND.

The committee of the Cleveland, Ohio, Chamber of Commerce on the abolition of grade-crossings in that city has given a very clear and concise report of its findings. To better solve their special problem, the solution reached in other cities was studied and reported upon.

The committee finds that there are one hundred and thirty-five grade-crossings within the city limits; twenty-nine in streets bearing surface railways, twenty-nine on main streets having no surface railways and seventy-eight on streets where traffic is not so heavy, and where the crossings are consequently less dangerous. The report states that the advantages to the steam railroad from the abolition of a grade-crossing are:

First, in the fact that all trains could maintain their regular speed at the crossing, thereby saving time.

Second, in the saving from the elimination of gates, gatemen and other safety devices.

Third, the saving in expensive maintenance of track and railroad property, an item which is large in many of the crossings of this city.

Fourth, in freedom from the danger of accidents at crossings, and the resulting liability. This liability of accident would increase proportionately with the increase of population in the city.

The advantages to a street railway are:

First, in the fact that by eliminating the necessary delays of the cars as now operated, the same service could actually be rendered with a less number of cars and crews. In other words, the item of time would represent directly to the street railway company a cash saving in salary of crews and cost of rolling stock, together with charges for maintenance and repairs. This saving would also involve a secondary saving in power at the central station, since the power necessary for operation varies approximately in the same ratio as the number of cars operated.

Second, there would be a saving in the installment of and in the maintenance of derailing devices and other safety appliances as well as the item of expensive maintenance of track at crossings.

Third, there would be saved the wear and tear on the motors and machinery due to imperfect crossings and the stopping and starting.

Fourth, there would be saved to the street railway company the danger of accidents at crossings, and the liability of the company for such, in a similar manner to the saving above noted to steam railway companies.

The advantages to the public are:

First, relief from delays to passengers on the street railway cars due to the necessary caution at all such crossings. This delay is constant whether trains are passing or not on the railroad track.

Second, absence from delay to all traffic whenever the gates at crossings are lowered for the passing of trains.

To estimate the capital that the municipality of Cleveland can spend wisely at the different crossings, observations were taken at them of the interruption to traffic caused by the grade crossings. At the intersection of Euclid and Wilson avenues the following estimate was made: Each street railway car is delayed ½ minute on account of the crossing either on the Euclid or Wilson lines, during an average day of seventeen hours; and one hundred trains delay traffic a total of two hours and eighteen minutes, or 1⅓ minute per train. It is thus found that 1,207 pedestrians, 740 vehicles and 4,068 passengers were delayed 1⅓ minutes each on account of trains, at a cost of $19·964; also that 33,119 were delayed ½ minute each, at a cost of $27·654; a total cost of $47·618 per day, which in one year amounts to $17,381, or 5 per cent on about $350,000. Similar investigations gave for Pearl Street $142,500 and for Detroit Street $106,000. The estimate of the total cost for abolishing the twenty-nine crossings having surface railways and the twenty-nine crossings on main streets not having crossings is $8,000,000, and they recommend the following division:

Steam Railway Companies to pay not less than..	$5,200,000 00
Street Railway Companies to pay not less than..	875,000 00
City of Cleveland to pay not over.....	1,925,000 00

The present law requires the steam railroads to pay not less than 65 per cent and provides that the municipality shall not pay to exceed 35 per cent of the total cost of making these improvements; but there is no provision requiring street railroads to pay any proportion. The benefits accruing from such improvements would inure more to their advantage than to the public at large, and in our opinion they should be compelled to pay their just proportion of the cost.

In conclusion, the committee submits the following recommendation:

First, that the Legislature be requested to pass a law requiring street railroads to pay not less than twenty-five per cent of the expense of abolishing grade-crossings used by them.

Second, that the Legislature also be requested to pass a law providing for the appointment of a grade-crossing commission, to be composed of the Governor, Auditor of State and Commissioner of Railroads, who shall have authority, in event of its satisfactorily being made to appear to them that a municipality has been unable to agree with any railroad company with respect to the abolishment of its grade crossings, to determine, after full hearing being given the parties interested, as to the necessity of abolishing such crossings, and as to the terms and conditions upon which the same should be done, including the apportionment of the cost thereof upon the parties interested.

Third, that the Mayor be requested to appoint a committee of seven representative citizens, who shall serve without compensation, to consider and report plans for the abolishment of all grade-crossings in this city, and to confer with the proper representatives of the various steam and street railroad companies, with a view to inducing them to agree upon the adoption of mutually satisfactory plans, and to contribute their just proportion of the cost of making such improvements.

Fourth, that to pay the legitimate expenses of such committee, including the expense of employing competent engineers to make the necessary surveys, and prepare plans and estimates to that end, the Counsel be requested to appropriate the sum of ten thousand dollars.

IMPROVED PRACTICE IN RAIL MANUFACTURE.

The demand made upon rails by increasingly heavy locomotives and car loads has required constant improvement in rail section and rail material. At one period of its development, the remark was made: "Looking at the rail on end, it is a very small affair, six or eight square inches in area, but when looked at in longitude we find that it is over 600,000 miles long, and every inch contains a blunder." Happily these blunders have been eliminated to a great degree.

The invention of the steam engine and the advent of railroads wrought vast changes in commercial and social national life. About 1865 the limit of endurance to heavy and fast traffic imposed by the iron rails of that period threatened to bring this national development to a standstill. The impending restriction was overcome by the manufacture of steel rails, which was made possible by the invention in 1856 of the Bessemer process for making steel; said invention "being of far greater importance to the world than all the gold of California and Australia." Although experiments with steel rails began soon after the Bessemer invention, some time elapsed before they were made commercially. In May 1865 a lot of six steel rails—the first rolled in the United States—was made by the North Chicago Rolling Mill Company. The first commercial steel rails were rolled in August 1867 by the Johnstown works of the Cambria Iron Company from ingots made by the Pennsylvania Steel Company at Steelton. From this time much attention was given to the rail section, each engineer having his own idea of the most suitable section, until in 1880 the rail mills were carrying rolls for about three hundred sections, and it was declared that a rail mill required a ten acre lot to store its rolls. At this time the following apostrophe to the scrap-head was truly applicable: "The scrap heap—that inarticulate witness of our blunders and the sepulchre of our blasted hopes, the best but most humilating legacy we are forced to leave to our successors—has always to me been brim-full of instruction."

The sections of the first steel rails followed the pear shape of the iron rail; later they were made so that the side of the rail head should exactly fit the wheel-flange; but it was observed that the rail with heavy heads did not wear so well as others with lighter heads, and that the greater surface contact between wheel and rail ground away the side of the rail head, since rolling friction had been changed to sliding friction. Now the approved section is comparatively high, has a small radius in the upper corner and a thin head with an area but little larger than that of the flange. The higher, stiffer rail decreases the wave in front of the wheels, thus lessening the creeping of the rail and the consequent wear on the ties, which produces local decay. This decrease in the rail wave also reduces the tractive resistance and the destruction to track and running gear due to the pounding of the wheels. The sharper corner allows the contact between the rail and the fillet of the wheel to approach a straight line, and thus secure rolling contact. The thinner head is sounder, harder and tougher, because a greater percentage of the metal is affected to a greater degree by the rolling, and the final passes through the rolls are made at a lower temperature, since the smaller amount of metal reaches a lower temperature before the flange cools too much.

The small head rail cools more nearly straight, also, because the amount of metal in head and flange are nearer equal. However, as the size of the rail and the rate of production increased it became more difficult to secure a low finishing temperature, since the large mass in the head could not be sufficiently cooled without subjecting the web and flange to a too low temperature. It is proposed to obviate this difficulty at the Edgar Thomson Steel Works of the Carnegie Steel Co. in the following manner: As the rails come from the intermediate or "short rolls" they are placed edgeways on a cooling-table with the head of one rail close to the flange of the next rail. By this arrangement the head is allowed to cool to the proper temperature without too low cooling of the flange, which would cause distortion. The rails reach the cooling-table with a temperature of about 1,750 degrees and remain on the table until it falls to nearly 1,600 degrees—about one minute and fifteen seconds—after which they are sent to the finishing rolls. This procedure does not interfere with the rapidity of operation of the mill, and gives much cleaner and smoother rails than when the finishing temperature is higher. The usual methods are employed after the rails leave the finishing roll except that, as there is less difference of temperature between the head and flange than in the ordinary process of rolling, less curving is necessary in the cambering rolls. Sections cut from the heads of rails made by the improved process show a very much finer grain than those from rails made by the common method. The former rails also show higher tensile and drop tests. This improvement in rail manufacture will secure a much better product, which will last longer and carry heavier traffic.

Mr. Robert W. Hunt, who was the Secretary of the committee of the American Society of Civil Engineers on "Standard Rail Sections," considers that this improved process in rail manufacture demands a revision of the sections of rails weighing over 85 pounds per yard. Mr. Hunt says: "I regard the described rail-rolling practice as a revolution in steel rail-making, and as such it justifies that which would have been unnecessary under other conditions. Now that the makers have modified their rolling practice it is but wise for railroad engineers to modify their rail sections so as to obtain the best results from such practice, and in doing this at the same time adopt sections which will be the best for renewing, while adhering to all of the essential features of the sections recommended by the American Society Committee. * * * At all events, if we adopt a section, which is, first, the best for the original manufacturer of the rail; second, which will give satisfactory results in service, and, third, which is good for renewal, it would seem as though we had acted wisely.'

ESPRIT DE CORPS IN RAILROAD MANAGEMENT.

It hardly needs to be said that a successful and ideal system for the accomplishment of a given purpose must have each part so adjusted that it will help the other parts, and that the accumulated energy of all will achieve the desired result. If any one part fails to fulfill its function, or performs it but indiffer-

ently, the object will be at best but imperfectly attained.

Too often in the management of work, those who are in authority are satisfied to direct operations at a distance and to adopt the method which brings a desired result in the immediate future with little thought for the morrow. Very different is the character of the services rendered by an employe who is told, "We do not expect that you will stay long, when a higher position is vacant it is the policy in this office to secure somebody from outside to fill it;" from the one who is told, "Your position will be what you make it; when a vacancy occurs it will be filled from our own employes, if there is any one qualified to take the work." Where the latter policy obtains, each employe, from the highest to the lowest, will perform his duty with dispatch, thoroughness and judgment. He will have pride in his work, will endeavor to find better and more efficient means for performing it, and will study with care the problems which come within his various duties. Probably the large majority of our railroads adopt that system. In line with this policy is the action of Vice-President Oscar G. Murray, of the Baltimore & Ohio Railroad Company, who has issued the order that "only in cases decided to be exceptional by the highest executive officers can any outsider be taken into the road's employ over the heads of old employes. In cases of emergency heads of departments may employ new applicants, but the officer must be reasonably certain that no employe in his department is capable of filling the position; and if the appointment to be made is in the operating department, the whole matter must be referred to the General Manager."

Again, from the highest to the lowest of those in authority, the effort should constantly be made to transact as much business as possible at first hand, and to become sympathetically acquainted with those upon whom reliance is placed for the execution of their plans. A good dictum is: Write as little, confer as much as possible; deal openly, plainly and as confidentially as the conditions will allow. A plan which will increase the efficiency and morale of the employes of the Boston & Maine Railroad Company has recently been inangurated by that company. The company has given the use of the building formerly used by the Fitchburg Railroad Company as an auditing office to the newly-formed Railroad Young Men's Christian Association of Boston, Mass. The expense of making the necessary changes in the building will be defrayed in part by the railroad company and in part by subscriptions from the employes. The association will be supported, as in other Young Men's Christian Associations, by dues from its members. The following arrangement of the building is proposed: On the first floor will be located a kitchen and a dining-room, so that meals can be obtained at any time during the day or night. Men arriving on late trains will be able to secure meals at a minimum expense in a well-appointed room. A large, nicely-furnished reception room will be placed on this floor with an adjoining room for the Secretary. There will also be bowling alleys and ample bathing facilities. The second floor will have class rooms and a library containing books and periodicals. The third floor is to be used exclusively as a dormitory. It is intended to have thirty beds, to be rented to members at twenty-five cents per night.

It is possible to attain desired results only by a conscientious, trained executive force working under the direction of a thoroughly informed, diplomatic management.

INCREASED LOCOMOTIVE BRAKING-POWER NEEDED.

The high speeds now attained by heavy trains with powerful locomotives make it very necessary to have the greatest available braking power. "Over and over again we have the lesson in passenger train accidents that it is the last twenty or thirty feet that kills." The truth of this statement was forcibly illustrated in an accident that happened in 1890, in which twenty-three people were killed and thirty more or less seriously injured. The facts in this accident were these: A track gang was using a track jack in surfacing a length of track near a curve on a down grade of thirty feet per mile. The engineer of an approaching train did not see the men until he was within 350 feet of them. This distance had decreased to 100 or 150 feet before the men were out of the way, so that he could see the track jack still in position. The engine was derailed thirty feet beyond the jack and ran 250 feet further before it overturned, while the cars ran 640 feet after the brakes were applied. The fourth car, containing seventy passengers, struck the rear end of the engine, and it was in this car that the most people were injured. A commission which investigated the accident reported that "had the train not gone the last forty-five feet none of the passengers would have been killed or even seriously injured."

The Westinghouse Air Brake Company gives some instructive information in a recent bulletin. The available braking weight of a train is the weight of the locomotive and the light weight of the tender and all the cars. The proportion of this available braking weight carried by the truck of the locomotives ordinarily used to haul suburban trains is as below:

For a two-car train, about 15 per cent.
For a three-car train, about 12 per cent.
For a four-car train, about 10½ per cent.
For a five car train, about 9 per cent.
For a six-car train, about 8 per cent.

From 10 to 15 per cent of the available braking-power is therefore thrown away with trains of from two to four cars—the number used in much suburban traffic—since, as seen in the above table, that is the proportion of braking power which the locomotive truck-brake would furnish if it were used. In the six-car train, the use of the truck-brake would decrease the distance in which it is possible to stop the train by about one-twelfth. No argument should be necessary to show the desirability and necessity for truck-brakes as a protection for life and property from the fatal "thirty feet." There is another advantage which the power to stop in a shorter distance possesses. To make fast time with frequent stops, a heavy engine is required which can attain high speed in the least possible time, and also have ample braking power to make quick stops. With the above important results to be attained, the managers of our railroads should exert every effort to obtain the most perfect control of trains possible and thereby add to the safety and efficiency of train operation.

Interest is payable only out of net earnings for the fiscal year up to 4 per cent and the rate is to be determined on or before October 15 in each year; interest was non-cumulative till July 1, 1900, and cumulative thereafter. Present issue is limited to $51,728,000, but when the $30,000,000 general 4s authorized for improvements as above have been issued (i. e., not before June 30, 1905), $20,000,000 additional adjustment 4s may be issued for the same purposes at not exceeding $2,000,000 in any one year, but only by a majority vote of the adjustment bondholders. *Interest*—In Nov., 1897, paid 3 p. c.; since, full 4 p. c. yearly.

San Francisco & San Joaquin bonds may be drawn at 110.

GENERAL FINANCES.—The guarantee fund notes due Nov., 1898, were retired by issue of $10,596,000 general 4s, thereby obviating the necessity of issuing prior lien bonds. ORGANIZATION, CONTRACTS, ETC.—The Company was chartered in Canada February 28, 1868, and debt readjusted in 1878. In Nov., 1882, a close contract was made with the Michigan Central for 21 years from Jan. 1, 1883, providing for payment to Canada South'n of one-third joint income over fixed charges. Under re-apportionment of December, 1892, it was agreed to give the Canada Southern 40 per cent and the Mich. Cent. 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided on the basis of one-third and two-thirds, as before. But under the original contract each company is still accorded all benefit from the reduction in its fixed charges; consequently as the Michigan Central to Jan. 1, 1898, had reduced its charges about $327,000, that amount is credited to it before division is made V. 64, p. 5.

In April, 1901, it was reported that arrangements would probably be made to exchange the stock for Michigan Central bonds, secured by the former in trust.—(V. 72, p. 775.)

ORGANIZATION.—Incorporated in Utah in July, 1899, as successor of the *railroad* under the plan of readjustment in V. 68, p. 378, by which plan the Southern Pacific acquired the entire capital stock and guaranteed the principal and interest of the two new Central Pacific bond issues shown above. The old indebtedness, including the U. S. Government loan, excepting about $693,000 bonds, has been discharged.

STOCK—(1) *Common stock*, $67,275,500, all held by So. Pac. Co.

(2) *Preferred stock*, 4 per cent cumulative, authorized issue $20,000,000, delivered to Southern Pacific Co. in consideration of issue of equal amount at par value of the Southern Pacific Company's 4 per cent gold bonds; of which delivered on completion of readjustment, $12,000,000; reserved to be delivered only to provide additional funds, if required, for the payment of 3 per cent notes to the United States, and thereafter only for betterments and additions, $3,000,000; reserved to be delivered for improvements and additions at not exceeding $200,000 yearly, $5,000,000.

Of the authorized issue $44,109,537 is held by the United States as collateral for 3 per cent notes. See ABSTRACT, V. 69, p. 808, and V. 70, p. 739.

Thirty-year gold 3½s, $25,000,000, secured by a second lien upon all the properties covered by the 1st ref mortgage, and also by deposit with the Trustees as acquired of all securities and moneys held in any sinking fund of the Central Pacific RR., consisting Jan. 1, 1899, of $12,553,000 in securities and $86,459 cash, and by a trust deed upon all the lands covered by the mortgage dated Oct. 1, 1870. See Mortgage Abstract, V. 69, p. 858; also see p. 851. From the proceeds of these sinking funds and land sales cancellation of bonds will be made from time to time; in February, 1900, $2,505,000 3½s were canceled, and to Jan., 1901, $1,313,000 additional had been canceled, reducing those outstanding to $19,877,000.—V. 70, p. 739; V. 70, p. 1194.

LAND GRANT.—Total land grant was about 12,000,000 acres, of which about 6,919,360 acres remained unsold on June 30, 1900. Sales in 1899-0, 67,128 acres; cancellations, 14,221 acres. Land contracts on hand July 1, 1900—principal of deferred payments, $713,472; average price per acre, $3 98.

GENERAL FINANCES.—Cancellation of the 3 s of 1899 is being effected from time to time from the proceeds of the sinking funds and also from land sales, $2,505,000 of the bonds being thus retired early in 1900. V. 70, p. 279, 739. Payment of one of the notes for $2,940,635 held by the Government was anticipated in Feb., 1900, and a second in Feb., 1901, in each instance releasing an equal amount of 4s deposited as collateral, which were sold.—V. 70, p. 429, 480. V. 72, p. 437.

The Southern Pacific Co. has acquired the stock of the Cent. The *consolidated mortgage* due in 1939 is for $30,000,000 (trustee, Central Trust Company), and sufficient bonds are reserved to provide for prior liens. This mortgage is also secured by deposit in trust of the $11,000,000 bonds and two-thirds of the stock of the Maysville & Big Sandy RR., [on road Ashland to Covington, Ky.], and of the Bridge to Cincinnati, all owned by Ches. & O. (Abstract, V. 49, p. 147.)

Richmond & Allegheny Division bonds cover the low-grade freight route from Richmond via Lynchburg to Clifton Forge and branches. (Mort. abstracts, V. 51, p. 144.)

The *general mortgage of* 1892 (Central Trust Co. and H. T. Wickham trustees) is for $70,000,000, but additional amounts at $25,000 per mile may be issued for double-tracking. Of the $70,000,000 as above, $32,691,000 bonds were reserved to provide for the $30,000,000 consols of 1889, issued or to be issued, etc. The balance unissued may be sold for new acquisitions, rolling stock, etc., but not more than $2,000,000 thereof in any one year. The mortgage covers the entire property of the company, real and personal, at the time the deed was made, and all additional property and mileage acquired with the proceeds of the bonds. See full abstract of mortgage in V. 54, p. 644; also V. 54, p. 642; V. 55, p. 335. In Jan., 1901, $28,809,000 had been listed on New York Stock Exchange, $1,500,000 having late in 1900 been sold for additions, improvements and double tracking.—V. 71, p. 553.

The *Louisville & Jeffersonville Bridge* bonds, of which $3,000,000 are outstanding, are guaranteed jointly and severally by the Chesapeake & Ohio and Cleveland Cincinnati Chicago & St. Louis; any deficit on account of the bridge is payable by them in the proportion of one-third and two-thirds respectively—see V. 60, p. 130; V. 61, p. 327, 559; V. 62, p. 84 and separate statement for L. & J. Bridge Co.

On June 30, 1900, the N. Y. Cent & Hud. Riv. and Clev. Cin. Chic. & St. Louis owned stock representing outlays respectively of $1,638,455 and $2,453,569. V. 71. p. 398, 505. On Jan, 1, 1901, the Pennsylvania RR. proper owned $7,000,000 and the Northern Central $1,500,000 additional stock.

The interest charges for the fiscal year 1900-01 are estimated at $3,331,281, against $3,230,144 in 1899-00. V. 71, p. 553.

ORGANIZATION—This *railway* company was organized in April, 1900, and purchased substantially all the stock of the Chicago & Alton *Railroad* Company, viz., $18,322,400 of the $18,751,100 common and $3,472,200 of the $3,479,500 preferred stock, all of which has been deposited as security under the first lien mortgage of 1900; also the line of the St. Louis Peoria & Northern between Springfield and Grove, 57 miles. The *railroad*, whose separate existence is maintained for legal reasons, has been leased for 99 years from April, 1900, the rental being the net earnings, after payment by the lessee of all interest on bonds, taxes and other charges, etc. (See V. 70, p. 686, 995.)

STOCK.—Authorized, $20,000,000 each of common and 4 per cent non-cum. preferred; issued in amounts as shown in table above, the unissued stock being reserved to exchange for the outstanding stock of the *railroad* company not now owned.

DIVIDENDS.—First semi-annual dividend on preferred, 2 p. c., paid Jan. 10, 1901.—V. 71, p. 1156.

BONDS.—The first lien 3½s of 1900 are secured by practically the entire capital stock of the C. & A. *Railroad*, as shown above, and by a direct first lien on Springfield to Grove, 57 miles.—V. 70, p. 894, 944. (See application to list in full in V. 71, p. 1021.)

The *railroad* mortgage securing the 3 per cents of 1899 will refund bonds marked "¶" in table maturing during next four years and also provide fund for improvements and extensions. Bonds in excess of $40,000,000 may be issued thereunder on vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1,000,000 per annum from Jan. 1, 1900. Stockholders in 1899-00 purchased $32,000,000 of the new 3 p. c. bonds at the rate of $650 cash for each $1,000 face value; V. 70, p. 739. See official circular in V. 69, p. 178; also p. 26, 129, 541; V. 70, p. 429, 995.

GENERAL FINANCES.—The charges of the Chicago & Alton RR for interest, rentals and 7 p. c. dividends have in the past aggregated about $2,600,000. The status of the property is now as follows:

Total.....	$2,744,430

Net income for year ending June 30, 1900, $2,964,628. The new management has made large expenditures for the development of the property, having purchased 4,000 new freight cars and 77 heavy locomotives, and undertaken important work in the reconstruction of bridges, etc.—V. 70, p. 686, 894, 944, 995.

The money to pay all the existing 6 and 7 per cent bonds having been deposited with the United States Trust Co., together with the interest thereon to the maturity of the several loans, the annual interest charge of the C & A. RR. Co. is virtually 3 per cent on the $31,988,000 new bonds, viz., $959,640.—V. 71, p. 1012.

ORGANIZATION, &c. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. Chicago Burlington & Northern and other subsidiary lines in Illinois were absorbed in May, 1899. V. 68, p. 975. In Dec., 1889, acquired Chicago Ft. Madison & Des M. RR. V. 70, p. 75. In June, 1900, the Kansas City & Omaha was acquired. V. 71, p. 134. The stockholders voted on Nov. 7, 1900, to purchase in fee the remaining leased lines in Iowa and Missouri held under lease, viz.: Kans. C. St Jos. & Co. Bluffs, St. L. K. & N. W., Chic. Burl. & K. C., Han. &. St. Jos., Keokuk & West. and Chic. Ft. Mad. & Des Moines, Burlington & Missouri River, etc.—V. 71, p. 697, 863, 963.

In Apr., 1901, a large amount of the stock was acquired in the interest of the Great Northern and Northern Pacific, which were arranging to issue in exchange for the stock 4 per cent bonds secured by the deposit of the stock in trust, on the basis of $200 in bonds for each $100 in stock, or an equivalent of a guaranty of 8 per cent on the stock.—(V. 72, p. 775.) See description of bonds under Great Northern.

A branch from Alliance, Neb., to Guernsey, Wyoming, and from Brush, Col., north to a junction therewith at Northport, Neb., about 150 miles, was opened Sept., 1900, of which 23 miles is Union Pacific trackage. V. 71, p. 437. Extension from Toluca, Mont., to Cody City, Wyoming, 120 miles, is under construction, and expected to be opened about June, 1901. In Mar., 1901, the Davenport Rock Island & Northwestern Ry., Moline, Ill., to Davenport, Ia., 40 miles, was acquired jointly with the Chic. Milw. & St. Paul Ry.—V. 72, p. 532, 675.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, and in 1880 a distribution of 20 per cent was made. From Sept. 1, 1890, to April, 1901, $13,495,200 stock was issued to retire an equal amount of convertible debentures, leaving still outstanding $2,522,000 convertible bonds. In April, 1899, $4,041,500 additional stock was subscribed at par, and stockholders of record on Feb. 7, 1901, subscribed at par to new stock to the extent of 10 per cent of their holdings. V. 72, p. 136. See "General Finances" below.

SINKING FUNDS.—Included in the bonds outstanding in the table above are sundry bonds of the company which are held alive and drawing interest for account of the various sinking funds.

BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.

The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest and those bearing interest at less than 3 p. c. at par and interest on any coupon day after thirty years. The issue is limited to $85,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River, upon the payment of $28,924,000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and $23,238,000 were issued in 1899-1900, as below stated. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771; *abstract*, V. 69, p. 283; V. 69, p. 795.

The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles." at $16,000 per mile; on second track (of which June 30, 1900, there were 86 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.)

Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m.

The collateral trust *Nebraska extension* bonds of 1887 are issued at $20,000 per mile for single and $10.000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $278,600 having been retired in 1900. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ into stock any time prior to Dec. 1, 1902, except when books are closed. $13,495,200 had been thus converted up to April, 1901. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1900, of the bonds given above as outstanding: Of g, $5,148,000 July 1, 1900; h, June 30, 1900, $1,931,000; k, $364,600. Also canceled bonds not included above, f, $3,364,000, July, 1900.

GENERAL FINANCES.—The Chicago Burlington & Quincy Railroad has been one of the most profitable in the country, as its numerous branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In April, 1899, stockholders subscribed for $16,166,000 new 3½ per cent bonds at 75 and $4,041,500 stock at par. In March, 1901, stockholders subscribed to 10 per cent ($9,922,700) new stock, the proceeds to be applied about as follows: To redeem sinking fund 5s due Oct 5, 1901, $2,315,000; to reduce grades, etc., $2,000,000; to build road, Toluca, Mont., to Cody, Wyo., 120 miles, $2,000,000, and balance for equipment, real estate, etc.—V. 72, p. 136. The first issue of the bonds took up the bonds of Chicago Burlington & Northern RR. and $1,076,000 Ottawa Oswego & Fox River Valley bonds, amounting in all to $13,787,500, at a cost of $14,235,575. The balance is to be used for improvements. Interest on the new bonds began July 1, 1899. See circular V. 68, p. 771; V. 69, p. 751. The C. B. & N. was merged in May, 1899. In 1899-00 an additional $5,076,000 Illinois Div. bonds were sold for construction purposes, etc., and $4,972,000 were exchanged for underlying bonds.—V. 70, p. 739, 1248; V. 71, p. 751, 808.

The company's sinking funds have received to June 30, 1900 over $20,350,000. With this money about $8,000,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1899-0 the aggregate sinking fund income was $1,098,072, of which $487,400 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

As unencumbered assets, on the other hand, the company owns besides the $14,244,900 Hannibal & St. Joseph stock above mentioned, a large amount of stocks and bonds, a list of the same being in V. 63, on pages 778 and 877. The road unbonded and the roads whose bonds were all owned on June 30, 1900 (V. 63, p. 775), were:

Chicago Great Western.—(CONCLUDED.)

On Sept. 7, 1893, the Great Western acquired by deed the title of the Chicago St. Paul & Kansas City Ry. (815·67 miles), subject to the mortgage bonds, of which it owns all except $1,000. It also acquired the title to the Leav. & St. Joseph Ry. (23 miles), which is unencumbered.

SECURITIES.—The holders of *debenture* and *preferred A* stock appoint the finance committee, which exercises general supervision of finances. Additional securities of said issues can be put out, but only with consent of a majority of both said classes of stock present at a meeting. Securities of other issues having a lien prior to preferred A can be created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock and of the trust deed were fully set forth in the editorial article of the SUPPLEMENT for October, 1897; see also V. 71, p. 441.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000 for future refunding and improvements. See General Finances below.—V. 66, p. 133, 663, 1088.

Cash interest resumed on all debenture stock and *all* the preferred "A" is entitled to cash dividends since July 1, 1899.—V. 67, p. 1206.

DIVIDENDS.—On pref. "A" paid Jan., 1899, 2 p.c.; in July, 1899 2 p. c.; in Jan., 1900, 2½ p. c.; July, 2½ p. c.; in Jan., 1901, 2½ p. c.

FINANCES.—The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund the Ch. St. P. & K. C. priority loan (the only mortgage debt), which was paid Jan. 1, 1900, and then outstanding lease warrants and sterling notes; of this stock there remained unissued March, 1901, $2,150,000, to provide for paying sterling notes and lease warrants maturing, additions and improvements. On Mar. 20, 1901, the stockholders voted to issue an additional $2,500,000 of 4 per cent debenture stock for capital expenditures in 1901, car trusts, etc—V. 72, p. 580. By improvements of the permanent way, etc., operating expenses were reduced in 1899-1900 to 66·81 per cent of earnings, against 70·13 per cent in 1897-8 and 77·47 in 1894-5.—V. 71, p. 441.

Early in 1901 Vermilye & Co. became the fiscal agents of the company, their Mr. Read entering the directory. See V. 72, p. 580.

In Mar., 1901, a syndicate subscribed $2,500,000 to acquire all the stock and bonds of the Mason City & Fort Dodge RR., Mason City to Fort Dodge, Ia., 90 miles, the purchase including coal fields near Ft. Dodge, and for extensions to be made in the summer of 1901 from Manly Junction to Mason City, 12 miles, and Hampton to Clarion, 30 miles, to connect with the Chic. Gt. Western. Financial arrangements were also made for $8,000,000 to build an extension to Omaha, 131 miles, and to Sioux City, 143 miles, a total of 274 miles.—V. 72, p. 580, 674.

In July, 1899, the Des Moines Nor. & West, 147 miles, was merged. V. 71, p. 494. The stockholders voted Sept. 23, 1899, to merge by consolidation the leased lines in Illinois. V. 69, p. 228, 694. In Sept., 1900, arranged with the Northern Pacific for trackage from St. Paul to Duluth. V. 71, p. 236. 603. Various extensions were built and building in 1900 '01. In Mar., 1901, the entire stock of the Davenport Rock Island & Northwestern Ry., Moline, Ill., to Davenport, Ia., 40 miles, was acquired jointly with the Chic. Burl. & Quincy RR., and the road will be used as part of a cut-off to be built in 1901 from Davenport to Ottumwa, 119 miles, between Chicago & Kansas City. V. 72, p. 437, 532, 675.

Capital Stocks.—The preferred stock has a prior right over the common stock to a dividend of not over 7 per cent from net earnings in each year, but if not earned it has no cumulative right. Common stock to be $55,971,120, stockholders subscribing at par to a 10 per cent increase, ($8,822,520) in April, 1901. See General Finances below. V. 72, p. 437. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $5,000,000 having been issued for other purposes (improvements, etc.) In July, 1900, $10,697,500 prior lien bonds outstanding were exchangeable for preferred.

In June, 1900, the Boyer Valley Ry., 86 miles, and the Minnesota & Iowa Ry., 119 miles, were absorbed after completion, their bonds having been issued at the rate of $16,000 per mile, guaranteed, principal and interest.—V. 71, p. 28. The Iowa Minnesota & Northwestern Ry., 194 miles; Boone County Ry., 7 miles; Mankato & New Ulm Ry., 26 miles; Minnesota & South Dakota Ry., 32 miles; Harlan & Kirkman Ry., 6 miles, were absorbed at the same time. V. 71, p. 291, 294. In June, 1900, the Princeton & Northwestern RR. was incorporated to build a line from Princeton, Wis., to Marshfield, 100 miles, and in Nov., 1900, the Peoria & Northwestern Ry., to build from Peoria, Ill., to near Nelson, 84 miles; in Apr., 1901, both were under construction.

History, &c.—The Chicago & North Western Railway was organized in 1859, and has since absorbed many other roads.

In December, 1882, a controlling interest was acquired in the stock of the Chicago St. Paul Minneapolis & Omaha Co., which see.

In July, 1884, the capital stocks (except a few shares) of the Fremont Elkhorn & Mo. Valley and the Sioux City & Pacific were acquired on the terms stated in the Supplement of June, 1885, and prior issues. Their securities, except those held by Chic. & N. W., are in table above. As to sale of Sioux City & Pac. on Government claim, see V. 72, p. 721.

In 1900 various proprietary roads were purchased and others built in the interest of the C. & N. W. absorbed.—V. 71, p. 291, 294

CAPITAL STOCK.—Of the common stock $2,333,688, and *preferred* $3,795 remained in the co's treasury in July, 1900. Pref. stock has a prior right to 7 p. c.; then common 7 p. c.; then preferred 3 per cent; then common 3 per cent; then both classes share.

BONDS.—*General Mortgage.*—See **Abstract** in V. 65, p. **1175**. The authorized issue is $165,000,000 (United States Trust Co., trustee). $131,640,000 are reserved to retire underlying bonds, and remainder for additions and improvements, $4,000,000 at once and $1,000,000 a year thereafter. The bonds may be issued bearing such rate of interest as shall be deemed advisable. See V. 65, p. 1070. The first issue of $20,000,000, bears 3½ per cent (reg. interest Q.—F., coupon M.&N.). V. 65, p. 69, 111, 571. Up to Apr., 1901, $11,994,000 had been listed. V. 67, p. 125; V. 72, p. 86.

The *sinking fund bonds* of 1879 are secured by deposit in trust of $15,000,000 of 1st mortgage bonds at $15,000 per mile on subsidiary lines, the most important being described in SUPPLEMENT of May, 1894. Of the sinking fund bonds of 1879 $6,069,000 are 6s; the sinking fund is at least 1 per cent of outstanding bonds, which are subject to call at 105; and through its operation the amount outstanding has been reduced from $15,000,000 to the figure in table.

The *sinking fund debentures* of 1933 have a sinking fund of $200,000 per year, if they can be redeemed at 105. These, as also the *debentures* of 1884 and 1891, will be secured by any future mortgage excepting any mortgage "for the enlargement, improvement or extension of the company's property." See description of all the debentures on page 2, SUPPLEMENT of April, 1895. The 25-year debenture mortgage of 1884 was for $6,000,000, but reduced by sink. fund purchases.

The *extension bonds of* 1886 are secured by deposit in trust of first mortgage bonds at a rate not exceeding $20,000 per mile. Included in the collateral June 1, 1896, were $10,675,000 Fremont Elkhorn & Mo. Valley 1sts and $2,560,000 Wyoming Central 1sts [the W. C. 4 per Cent. having been consolidated with F. E. & M. V.], etc. To Aug., 1900, Extension 4s for $18,632,000 had been listed on N. Y. Stock Exchange, of which, June 1, 1900, $1,143,000 were held alive in sinking funds. See F. E. & M. V. bonds below. Union Trust Co. of N. Y., trustee.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.

The *Milwaukee Lake Shore & Western* debentures of 1887 were by their terms convertible into M. L. S. & W. stock, but North Western officials state that the bonds are not convertible into North West stock.

The Boyer Valley Minnesota & Iowa, Boone County Mankato & New Ulm, Minneso a & South Dakota and Iowa Minnesota & Northwestern bonds were assumed in June 1900, the roads being absorbed upon completion. See V, 71, p. 28, 291, 294, 340.

LAND GRANT.—Lands and lot sales in 1899-00, $834,218; net cash receipts, $599,387; lands unsold May 31, 1900, 600,871 acres.

GENERAL FINANCES.—The first issue of ($20,000,000) refunding bonds at 3½ per cent interest was sold to provide for $18,015,500 old bonds maturing up to Dec. 1, 1902. If the entire issue of $20,000,000 is required to refund these old bonds the saving in interest charges will be about $530,000 per annum—see "bonds" above and V. 65, p. 69, 111. In Jan., 1901, $9,680,000 old bonds had been exchanged for gen. 3½s, leaving $27,962,000 still outstanding. See V. 72, p. 86.

In 1899-00 the average freight train load was 235 tons, against 208 tons in 1898-9; rate per ton mile, 0·83 of a cent.

EARNINGS.—For 9 mos. ending Feb. 28, $32,426,191 gross in 1900-1, against $32,668,853 in 1899-0. For calendar year, V. 72, p. 212:
